Campus 1

FACULTY OF INFORMATION TECHNOLOGYAND SCIENCE
Bachelor of Information Technology and Science in Computer Networking and Cyber Security (BIT-CNCS) National Program (Batch VI, 1st Intake)
LIST OF SUPERVISORS AND SUPERVISEES

№	ID	NAME IN LATIN	SEX	RESEARCH TOPIC AND QUESTIONS	GROUP	SUPERVISOR	OTHERS
1	56036	BRUNG SOVANN	M	**Firewall Security Implementation and Configuration** 1. Which rule and policy that the proposed solution must configure? 2. Which ports and traffic that must/not open? 3. What are the commom patch/update?	1	**Mr. HAK LYHOUR** **Tel: 077 335 291**	
2	55720	ENG SOVICHEA	M	**Secure Network Protection with Triple Load Balancing** 1. What can guarantee secure and available network backup from load balancer? 2. What are the setting and configuration for the best practices? 3. Why is it important for data availability?			
3	57859	HOR KIMHONG	M	**AI Video Verification** 1. What are the techniques or machine learning to verify AI generation vs real video? 2. What are the security prevention ? 3. Which organization or tools that we can fully trust?			
4	50305	KONG CHHAINA	M	**Evaluation of Windows Server Security** 1. How effectively are Windows Server security features (such as Active Directory security controls, firewall settings, and Group Policy configurations) implemented to prevent unauthorized access? 2. What vulnerabilities exist in the current Windows Server environment, and how well are patch management and update policies maintained to mitigate security risks? 3. How adequate are the monitoring, logging, and incident response mechanisms in detecting and responding to security threats on Windows Servers?			

5	57426	KORNH MLUB	M	**Windows Defender Protection** 1. Which network policy should we prioritize on? 2. How about removable Device Security? 3. How about the anti-malware protection?	1	**Mr. HAK LYHOUR** **Tel: 077 335 295**	
6	57872	KORT MESA	M	**Open Worldwide Application Security Project (OWASP) Top 10** 1. What the most use case for Owasp 10? 2. Which one has highest impact and its techniques? 3. What are the best security protection?			
7	56629	MEY PANHA	M	**Malicious Removable Devices Self-Execution** 1. What step to configure the Plug-in auto executing script? 2. Which programming do we use? 3. What are the security protection against it?			
8	56076	MONY HORA	M	**Mail Protection and Window Protection** 1. Which Open-source mail security configuration and tool used to do so? 2. What are the mail protection from window settings? 3. How can we surely assume on overall mail security?			
9	58078	NGOY LEANGHOUR	M	**AI Agent Security Defense** 1. What playbook do you want to create? 2. What are the Top 10 exercise for defenses? 3. How AI agent can be your good practice in blue team?			
10	56775	NY VANDY	M	**Secure Data Sharing in Cloud Environment** 1. How data is secure in Cloud Environment for healthcare sector? 2. How about the Double Encryption method with access control ? 3. How can you manage the key?			
11	56099	PHAL PISETH	M	**Open world-wide Application Security Project (OWSAP) Top 10** 1. What are the up-to-date attack that occur for years and still effective? 2. Why it is still a burden for industries and any patterns of that? 3. What are your proof on it and how to prevent it?			
12	56717	PHEACH POV	M	**Top Social Engineering Techniques** 1. what are the latest trends of attack with social engineering? 2. Which techniques are the most effective and in what pictures? 3. How to prevent yourself from it?			
13	57592	PHEAP KEUMLY	M	**Install Windows Server Security** 1. How do we keep the server stable and secure? 2. What is Antivirus and Malware data backup remote access security Logging and Auditing ? 3. What should we do when a hacker attacks our server?	2	**Mr. HUY SOPHEAKTRA** **Tel: 081 613 684**	

14	56047	PHORN PHANITH	M	**Design and Implementation of a Secure LAN Infrastructure for Small Businesses** 1. How can a well-planned network design improve speed and security in a small company? 2. What main devices and tools are needed to build a good LAN (Local Area Network) for a small company? 3. How do VLAN and DHCP settings help manage the network and share resources better?	2	**Mr. HUY SOPHEAKTRA Tel: 081 613 685**	
15	57471	ROS SOPHAY	M	**Defense in Depth Strategy for Enterprise Networks** 1. How effective is a Defense in Depth strategy in protecting enterprise networks against modern cyber attacks (e.g., ransomware, phishing, insider threats)? 2. What combination of security layers (firewall, IDS/IPS, endpoint security, access control, segmentation, etc.) provides the best balance between security, cost, and performance in enterprise networks? 3. How does implementing Defense in Depth improve incident detection, response time, and overall network resilience in an enterprise environment?	2		
16	57127	SAO PANHA	M	**Design and Implementation of a Secure Campus Network using VLANs, ACLs, and Centralized Monitoring** 1. How can we improve better on VLAN trunking communicated with each other by efficiently on department? 2. How control how VLANs access outgoing from local made sure that's inside and outside had enhancing on port and using protocol to control both of traffic? 3. Purpose indicate of this topic to determine clearly on security VLAN port Access port, Trunking port that's division by department again and using ALCs controlling set rules permit and deny on VLANs by security filtering prevention unauthorized access, income and outcome based on filtering traffic?	2		
17	56424	SEANG PISETH	M	**A Comparative Study of IPv4 and IPv6: Evaluating Performance Metrics, Security Architectures** 1 .How do the architectural and addressing differences between IPv4 and IPv6 affect network performance? 2 .What are the key security differences between IPv4 and IPv6, and how do they impact network protection? 3 .What challenges and best practices exist for migrating from IPv4 to IPv6 in enterprise networks?	2	**Mr. HUY SOPHEAKTRA Tel: 081 613 684**	

18	56271	SEY PHOUVARAK	M	**Secure Email Infrastructure Design: Mail Server Hardening, Email Threat Defense, and Multi-Factor Authentication** 1. How can a secure email infrastructure be designed and implemented through effective mail server hardening techniques? 2. What are the major cyber threats targeting email systems, and what technical and organizational controls can be used to prevent and mitigate these attacks? 3. How does the implementation of Multi-Factor Authentication (MFA/2FA) improve the security of email systems and support response to account compromise incidents?	2	**Mr. HUY SOPHEAKTRA** **Tel: 081 613 685**	
19	58248	SIV CHAN LONG	M	**Design and Implementation of a Secure Network and Cyber Security Framework for Small Business Environments** 1. What are the main network and cyber security threats faced by small business environments such as marts, farms, and rental houses? 2. How can a secure network architecture be designed to protect business operations, customer data, and connected devices in small business environments? 3. How effective is the proposed security framework in improving data protection, network reliability, and access control for small businesses?			
20	55882	SOM SOKNOV	M	**Data Privacy Measures in Modern Mobile and Web Applications** 1. What challenges do developers face when implementing data privacy measures, and how can these challenges be mitigated? 2. How effective are these privacy measures in preventing unauthorized access and data leakage in mobile and web applications? 3. What data privacy measures are commonly implemented in modern mobile and web applications to protect user data?			
21	51513	SOTH DARAREAKSMEY	M	**Design and Implementation Analysis of Secure High-Performance WLANs for Small Business Operations** 1. What are the basic requirements needed to design a wireless network for a small office environment? 2. How does access point placement affect wireless coverage and performance in a small office? 3. What basic security measures are necessary to protect a small office wireless network?			

BELTEI INTERNATIONAL UNIVERSITY BELTEI INTERNATIONAL UNIVERSITY BELTEI INTERNATIONAL UNIVERSITY BELTEI INTERNATIONAL UNIVERSITY BELTEI INTERNATIONAL UNIVERSITY

22	57161	SOU MAKARA	M	**Understanding Mail Server Security and Its Role in Preventing Cyberattacks** 1.what is mail server security? 2.why is it necessary to secure mail server? 3.why is email a common target for cyberattacks?	2	**Mr. HUY SOPHEAKTRA** **Tel: 081 613 686**	
23	56259	VATH PANHAMEAS	M	**Design and Implementation of Secure LAN/WAN Network Infrastructure for Small and Medium Enterprises** 1. How can LAN/WAN network design be optimized to balance performance, scalability, and cost-effectiveness for small and medium enterprises (SMEs)? 2. What are the key security challenges in implementing LAN/WAN networks, and how can technologies such as firewalls, VPNs, and intrusion detection systems mitigate these risks? 3. How does the implementation of modern LAN/WAN technologies (e.g., VLANs, MPLS, SD-WAN) improve network reliability and user experience compared to traditional setups?			
24	58299	VIN RAVITH	M	**Installing a stable and secure network in small buildings and small company** 1. What should I do to make the network stable and secure? 2. What is basic (load balancing_NAT_ ZTNA_SDN ? 3. What should we do when we install an unstable network?			

Notes:

1. Meeting with all Supervisors: **February 06, 2026**
2. Seminar/Orientation with Supervisors and Students: **March 30, 2026**
3. Due date for Research Proposal Paper (3 chapters) Submission: **May 25, 2026**
4. Due date for Research Progressive Paper (6 chapters) Submission: **July 06, 2026**
5. Due date for BA-Thesis and Defense Slides Submission: **November 10, 2026**

Phnom Penh, Date: 03 /03 /2026

President

LY NAVUTH
