Campus 1

FACULTY OF INFORMATION TECHNOLOGYAND SCIENCE
Bachelor of Information Technology and Science in Software Engineering (BIT-SE)
National Program (Batch VI, 1st Intake)
LIST OF SUPERVISORS AND SUPERVISEES

№	ID	NAME IN LATIN	SEX	RESEARCH TOPIC AND QUESTIONS	GROUP	SUPERVISOR	OTHERS
1	55984	KEAM SEREY	M	**Development of a Web-Based E-Commerce Application** 1. How can a web-based e-commerce application be developed to support online buying and selling? 2. What core features are required in a web-based e-commerce application to manage products, customers, and orders? 3. How effective is the developed web-based e-commerce application in facilitating online transactions?	1	**Mr. PAY LATEN** **Tel: 096 747 7717**	
2	56852	KEO HALECK	M	**Web-Based Bus Ticket Booking System** 1. Why is a web-based bus ticket booking system needed to replace or improve the existing manual ticket booking process? 2. Why was the web-based bus ticket booking system chosen as a suitable topic for a software engineering final-year project? 3. Why is this system important for improving efficiency, accessibility, and management in public transportation services?			
3	55837	LY SATHEAPECH	M	**POS and Staff Management System** 1. How does the system improve accuracy in transactions and records? 2. How user-friendly is the coffee management system for staff and customers? 3. How can the system reduce order processing time compared to manual ordering?			
4	58303	MAT EASA	M	**POS System Management for Retail Business** 1. To what extent does the implementation of a Point of Sale (POS) system enhance inventory accuracy and improve warehouse management efficiency? 2. How does real-time data integration within a POS system contribute to the reduction of financial discrepancies and the mitigation of operational risks? 3. How do analytical and reporting capabilities of POS systems support managerial decision-making and strategic planning within organizations?			

5	57973	PHAL SOKCHEA	M	**POS and Stock Management System** 1. What are the main problems faced by retail businesses when using manual or non-integrated Point of Sale and inventory systems? 2. Where can an integrated Point of Sale and Inventory Management System be applied in real business environments? 3. What benefits does this management system provide to business owners when they use it?	1	**Mr. PAY LATEN** **Tel: 096 747 7721**	
6	55988	PHIRUM PANHAROTH	F	**Development of a Cafe Order Management System** 1. Why is a Cafe Order Management System critical for enhancing the efficiency of daily operations in coffee shops? 2. What essential features should a Cafe Order Management System incorporate to effectively address the operational requirements of shops? 3. When should a Cafe Order Management System be implemented in the daily workflow to optimize order processing efficiency and elevate customer service quality in coffee shops?			
7	55879	PICH SOPPOGNU	M	**Development of a Hotel Room Booking Management System** 1. Why is a Hotel Room Booking Management System with room allocation optimization important for enhancing daily operations and overall efficiency in hotels? 2. What key features, including room allocation optimization, should be incorporated in a Hotel Room Booking Management System to meet the operational needs of hotels? 3. When should a Hotel Room Booking Management System be implemented in daily hotel operations to improve reservation management and optimize room allocation in hotels?			
8	57056	ROEUNG BUNCHHORNG	M	**Smart Attendance System Using a Web Application for BIU – Faculty of Information Technology and Science** 1. What problems exist in the current student attendance system at the Faculty of Information Technology and Science at BIU? 2. Why is a smart web-based attendance system needed to improve attendance management at BIU? 3. How effective is the proposed smart attendance web application compared to the existing manual attendance method?			
9	58138	SAN SREYLEN	F	**Develop web application point of sale system for cafe businesses** 1. What technologies are required to design and implement an effective web-based Point of Sale system? 2. How does a Point of Sale system improve operational convenience and sales performance in café businesses? 3. How does a Point of Sale system improve the efficiency of sales and order processing in café businesses?			

10	57042	SENG MOHOK	M	**Web-Based Inventory Management System** 1. What is a Web-Based Inventory Management System, and what are its main features for managing products, categories, and stock levels? 2. Why is a Web-Based Inventory Management System important for organizations to improve inventory accuracy, efficiency, and decisionmaking? 3. When should organizations use a Web-Based Inventory Management System to replace manual or spreadsheet-based inventory tracking?	1	**Mr. PAY LATEN** **Tel: 096 747 7717**	
11	56801	SREANG PISETH	M	**Web-Based Clinic Information System** 1. Why is there a need to develop a web-based clinic information system to replace the existing manual clinic data management process? 2. How can a web-based clinic information system improve the management of patient information and appointment scheduling in small healthcare clinics? 3. What system features and design considerations are required to develop an effective and reliable web-based clinic information system?			
12	54509	TANN BORAMEY	M	**Open Source Sustainability: Analyzing Contributor Churn and Governance in Critical Infrastructure Projects** 1. What are the primary predictors of "contributor burnout" in high-traffic open-source libraries? 2.How does the presence of a formal corporate sponsor affect the speed of security patch releases in open-source projects? 3. Can "automated governance" (bot-driven PR labeling and linting) significantly reduce the administrative burden on maintainers?	2	**Mr. KHAN SOKHA** **Tel: 017 733 886**	
13	56532	TENG PANHA	M	**Progressive Web Apps (PWAs) as a Replacement for Native Retail Applications: A Conversion Rate Study** 1. Can the 2026-era Web Push and background sync capabilities of PWAs match the user engagement levels of native app notifications? 2. How does the "No-Install" friction of PWAs impact initial user acquisition compared to the trust-building presence of an App Store listing? 3. What is the performance gap in offline-first capabilities for retail apps with large product catalogs?			
14	57562	VANNY VANNITH	M	**Role of IT in Modern Supply Chain Management** 1. How does IT impact collaboration between suppliers manufacturers, and distributors? 2. What role does information technology (IT) play in improving the efficiency of modern supply chain management? 3. What are the challenges in implementing IT in supply chain management?			

15	56740	CHEA DALI	M	**The Impact of Dark Mode and Minimalist UI on Cognitive Load and User Retention in Educational Apps** 1. Does the use of "Dark Mode" significantly reduce eye strain and increase session duration for night-time learners? 2. How does minimalist UI design affect the information retention rates of students using mobile learning platforms? 3. Is there a correlation between UI complexity and user drop-off rates in adult education software?	2	**Mr. KHAN SOKHA** **Tel: 017 733 886**	
16	56340	CHEANG ODOM	M	**Smart Campus: IoT-Integrated Resource Management and Attendance Tracking** 1. Can BLE (Bluetooth Low Energy) beacons provide more reliable attendance data than traditional QR or biometric systems? 2. How can real-time occupancy data from IoT sensors optimize the energy usage of university lighting and HVAC? 3. What are the privacy concerns of students regarding real-time location tracking on campus?			
17	55871	CHEAT KIMHONG	M	**Impact of AI-Assisted Coding (GitHub Copilot/Cursor) on Junior Developers Skill Acquisition and Code Quality** 1. Does heavy reliance on AI code-generation tools lead to a "black box" understanding of fundamental algorithms among junior developers? 2. How does the code produced by AI-assisted developers compare in security and memory efficiency to code written manually? 3. Can AI tools be configured to act as "pedagogical mentors" rather than just auto complete engines to accelerate learning?			
18	57696	CHHOUY THEARY	M	**Open Source Sustainability: Analyzing Contributor Churn and Governance in Critical Infrastructure Projects** 1. What are the primary predictors of "contributor burnout" in high-traffic open-source libraries? 2. How does the presence of a formal corporate sponsor affect the speed of security patch releases in open-source projects? 3.Can "automated governance" (bot-driven PR labeling and linting) significantly reduce the administrative burden on maintainers?			
19	58197	CHOMROEUN KAKRONA	M	**Development of a B2C E-Commerce Platform for an Online Clothes Store in Cambodia** 1. How can a B2C e-commerce platform be designed and developed to support online clothing sales in Cambodia effectively? 2. What features and technologies are needed to manage products, inventory, orders, payments, and delivery for an online clothes store in Cambodia? 3. How does an online clothes e-commerce platform improve customer convenience, satisfaction, and repeat purchasing in Cambodia?			

20	57719	EAV PHEAROM	M	**Design and Development of a Dormitory Management System for University Student Accommodation** 1. What is the purpose of this dormitory management system? 2. Why is this system important for university dormitory management? 3. How does the proposed system improve the existing manual process?	2	**Mr. KHAN SOKHA** **Tel: 017 733 886**	
21	57310	ECH LEAKHENA	F	**Design and Development of a B2C E-Commerce Platform with CRM for Cosmetic Products in Cambodia** 1. What features and technologies are needed to manage products, inventory, orders, and payments for cosmetic products in Cambodia? 2. Why does the integration of CRM in a B2C e-commerce platform improve customer engagement, satisfaction, and repeat purchases for cosmetic products in Cambodia? 3. How can a B2C e-commerce platform be designed and developed to effectively support online cosmetic product sales in Cambodia?	3	**Mr. CHHAI CHIVON** **Tel: 070 446 697**	
22	57117	HOK DO	M	**Design and Development of a Mobile Application to Enhance Customer Experience in Online Fashion Clothing Retail** 1. What are the essential functional requirements of a mobile application for online fashion clothing retail? 2. Why is mobile commerce an important platform for the growth and competitiveness of online fashion clothing retail businesses? 3. How can a mobile application be implemented to support effective product browsing and purchasing processes in online fashion retail?			
23	56132	HOUR SIVCHHING	F	**Design and Development of a Cross-Platform Mobile Application for Integrated Online Bookstores and Digital Content Delivery** 1. What are the main features needed for a cross-platform mobile app that combines online bookstores and digital content delivery? 2. Why is a cross-platform mobile application useful for improving access and user experience in online bookstores? 3. How can a cross-platform mobile app be developed to deliver digital book content effectively on different devices?			
24	57847	KHUN LEABHENG	F	**Design and Development of an Online Sales Application for Retail Businesses in Cambodia** 1.What features should an online sales application include to meet the needs of customers and online businesses? 2. How can an online sales application improve sales management, customer experience, and transaction efficiency? 3. What tools and technologies are most suitable for designing and developing a secure, scalable, and user-friendly online sales application?			

25	57715	LAY LY HENG	M	**Design and Development of an Online Quiz Platform to Enhance Learning and Facilitate Digital Assessment** 1. What are the key functional and non-functional requirements of an online quiz platform designed to enhance learning and support digital assessment? 2. Why is an online quiz platform more effective than traditional assessment methods in modern education? 3. How can an online quiz platform be designed and developed to improve student engagement and learning outcomes?	3	**Mr. CHHAI CHIVON** **Tel: 070 446 701**	
26	56879	LIM NAVY	F	**Design and Development of an Integrated Mobile Consultation and Appointment System to Enhance Mental Health Accessibility** 1. What are the key barriers that limit access to mental health services, and how can a mobile-based consultation and appointment system address them? 2. What functional and non-functional requirements are necessary for designing an integrated mobile mental health consultation and appointment system? 3. How can an integrated mobile consultation and appointment system be designed and developed to support efficient communication between clients and mental health professionals?			
27	56438	LIM SOKMENG	M	**Design and Development of a Maintenance Request Management System for Apartments in Cambodia** 1. What are the main maintenance problems commonly reported by tenants in an apartment in Cambodia? 2. How does a maintenance request management system help apartment management track and handle maintenance requests efficiently? 3. Why is a maintenance request management system important for improving maintenance service and tenant satisfaction in an apartment?			
28	56710	LIM TOUCHKHEVITEP	M	**Design and Implementation of a Web-Based Doctor Attendance and Shift Management Information System for Hospitals** 1. How can a web-based information system improve the accuracy of doctor attendance tracking in hospitals? 2. How does automated shift scheduling reduce conflicts and understaffing in hospital departments? 3. What is the impact of a role-based doctor attendance system on administrative workload efficiency?			
29	56756	MANG SOKSAMNANG	M	**Design and Development of an Information Website for Disseminating Important Public Information in Cambodia** 1. How can an information website be designed to effectively disseminate important public information to Cambodian citizens? 2. What types of information are most important for the Cambodian public to access through an information website? 3. How can an information website improve accessibility and timely access to public information in Cambodia?			

30	57505	MIL PISA	M	**Design and Implementation of a Web-Based E-Commerce System for Pisa Coffee & Co** 1. What is an e-commerce website? 2. Why is an e-commerce website important for small businesses in Cambodia? 3. How does the e-commerce website help Pisa Coffee & Co. sell products online?	4	**Mr. SANN SOPHAR** **Tel: 016 801 119**	
31	55860	MORM KIMHENG	M	**Development of a Form-Based Digital Marketing Planning System for Agency–Client Collaboration at LaorMedia** 1.How can a form-based digital marketing planning system be designed to support effective collaboration between an agency and its clients at LaorMedia? 2.What challenges do LaorMedia and its clients face in the current digital marketing planning process, and how can a form-based system address these challenges? 3. How does the implementation of a form-based digital marketing planning system affect planning efficiency, communication clarity, and client satisfaction at LaorMedia?			
32	57292	MUY SAROTH	M	**Web-based POS Supermarket Management System** 1. What problems does Food Mate Supermarket face in managing POS, stock, and sales using the current system? 2. How does a web-based POS stock and sales system improve operational efficiency at Food Mate Supermarket? 3. Why is a web-based management system important for improving stock control and sales accuracy in supermarkets?			
33	57075	NA RITHY	M	**An Integrated Web-Based POS and Inventory Tracking System for Thaihuot Supermarket** 1.How can an integrated web-based POS and inventory tracking system streamline daily operations and reduce manual workload for staff at Thaihuot Supermarket? 2.How can real-time inventory monitoring help prevent stock shortages and overstocking issues, especially for perishable goods at Thaihuot Supermarket? 3.How can automated sales and inventory reporting provide actionable insights to improve purchasing decisions, profit margins, and product management at Thaihuot Supermarket?			
34	57601	NOENG CHENGHENG	M	**Payroll Management System for Move24 Express** 1.What are the essential functions of a payroll management system in handling employee records, salary calculation, and payslip generation? 2.Why is automating payroll processes important for organizational efficiency, accuracy, and employee satisfaction? 3.How can a payroll management system be designed and implemented to ensure secure, accurate, and user-friendly payroll operations?			

35	56437	NOUR CHOMRONG	M	**A Web-Based Student Information System for Student Access with Data Accuracy at Toul Tumpoung High School** 1.What challenges do students face in accessing student information at Toul Tumpoung High School? 2.How does the current system affect the accuracy of student data at Toul Tumpoung High School? 3.How can a web-based student information system improve student access and data accuracy at the school?	4	**Mr. SANN SOPHAR** **Tel: 016 801 119**	
36	57902	OEUN LIHOR	M	**Design and Implementation of Student Enrollment and Management for Cheasim Kompong Thmor** 1. What challenges do administrators and staff face when enrolling and updating student records using the current system? 2. What functional requirements are necessary for an effective student enrollment and management system? 3. How reliable is the proposed system in maintaining consistent and up-to-date student information over time?			
37	56983	PHAL CHHEOUNTHEBDEY	M	**A Decision Support System Using Generative AI for Academic Major Selection Among Grade 12 Students After BACII** 1. What specific challenges do Cambodian high school graduates face when interpreting their BAC II results to select a university major? 2. How can an intelligent recommendation system integrate Cambodia's unique BAC II grading criteria with machine learning algorithms to provide personalized academic suggestions? 3. Why is a web-based automated system more effective than traditional methods in reducing major-mismatch and dropout rates among Cambodian university students?			
38	56650	PHANN CHIVORN	M	**An Automated Doctor Appointment System for Improved Healthcare Service Delivery at Calamette Hospital** 1. What challenges are associated with the current doctor appointment scheduling system at Calamette Hospital? 2. What features and functionalities are required in an automated doctor appointment system to improve healthcare service delivery at Calamette Hospital? 3. What impact does an automated doctor appointment system have on patient waiting time, staff efficiency, and overall service delivery at Calamette Hospital?			
39	53479	PHONG THONVATH	M	**Git in the Age of AI** 1.What impact do AI-assisted coding tools have on Git commit practices in student software projects? 2. How does the use of AI-generated code influence version control behavior and code change tracking in Git? 3.Why is it important to establish proper Git practices when using AI tools in student software development?			

40	57492	PROS PRA	M	**Student Information and Activity Management System for SURAMRIT High School** 1. What is a Student Information and Activity Management System? 2. Why does SURAMRIT High School need this system? 3. How will the system help manage student information and activities?	4	**Mr. SANN SOPHAR** **Tel: 016 801 119**	
41	57067	ROEUNG NAK	M	**An Integrated Web-Based POS and Inventory Tracking System for LY HOUR COMPUTER** 1. How can a web-based POS system improve the speed, accuracy, and efficiency of sales transactions at LY HOUR COMPUTER? 2. How can an integrated inventory tracking system reduce stock errors (missing items, incorrect stock counts, and out-of-stock issues) at LY HOUR COMPUTER? 3. How can the system generate real-time reports (sales, stock, profit, and best-selling products) to support better decision-making for the business owner and staff?			
42	57840	ROEUNG SREYDEN	F	**A Web-Based Parking Management System for BELTEI International University** 1. What is the purpose of this system? 2. Who will benefit from this system? 3. Why is this system important for Beltei International University?	5	**Mr. KEO TONGHENG** **Tel: 093 205 555**	
43	57681	ROUS PISEY	F	**A Library Management System With Automated Borrowing And Reporting For BELTEI International University** 1. What is the purpose of this system? 2. Who will benefit from this system? 3. Why is this system important for BELTEI International University?			
44	56990	RY CHET	M	**Design and Development of a Web-Based Habit Tracker System with Telegram Notifications** 1. What is the purpose of this system? 2. Who will benefit from this system? 3. Why is this system important?			
45	58157	SOKRETH THAN ISSARA	M	**Design and Development of an E-Attendance System at Beltei International University** 1. What is the purpose of this system? 2. Who will benefit from this system? 3. Why is this system important for educational institutions, especially at Beltei International University?			
46	57043	SOT PHANIT	M	**Design and Development of a Web-Based Job Portal System for Local Cambodians** 1. What is the purpose of this system? 2. Who will benefit from this system? 3. Why is this system important for BELTEI International University?			
47	57932	THA MOM	F	**A Web-Based Bookstore Management System for BELTEI International University** 1. What is the purpose of this system? 2. Who will benefit from this system? 3. why is this system important for beltei international university?			

48	58288	THALL SOKNY	M	**Design and Implementation of a Seller Administration System for Efficient Merchant Shop Management** 1. How can a seller administration system improve the efficiency of managing merchant shops compared to manual methods? 2. What features are essential for a user-friendly and secure seller administration platform? 3. How can product, order, and seller data be managed dynamically through the system?	5	**Mr. KEO TONGHENG Tel: 093 205 561**	
49	57712	UN SOMNANG	M	**A Smart Administrative and Financial Management System for Kuti No. 17, Wat Botumvatey Rajavararam** 1. What is the purpose of this system? 2. Who will benefit from this system? 3. Why is this system important for Kuti No. 17 at Wat Botumvatey Rajavararam?			
50	57484	VONG VISAL	M	**Design and Development of a Web-Based Academic Task Management System for Students at BELTEI International University** 1. What is the purpose of this system? 2. Who will benefit from this system? 3. Why is this system important for Beltei International University?			
51	57879	BARANG LEANGHOUR	M	**Design and Development of a Multi-Vendor Mobile E-Commerce Application for Agricultural Products** 1. How can a multi-vendor mobile e-commerce application help farmers and vendors sell agricultural products more efficiently? 2. How does the proposed system improve the buying and selling process of agricultural products using mobile technology? 3. How can this application support direct interaction between farmers, vendors, and customers in the agricultural market?			
52	57402	BIN ROBY	F	**House and Room Rental Management System for Locals in Cambodia** 1. What is the purpose of this system? 2. Who will benefit from this system? 3. Why is this system important for locals in Cambodia?			
53	57781	CHETHA LIHOUR	M	**Development of a Web-Based Library Management System for BIU Campus 1** 1. How can a web-based library management system be designed and developed to improve library operations at BIU Campus 1? 2. What functional requirements are needed to support daily library operations? 3. What system features are essential for the initial implementation of the library management system?	6	**Mr. THINH SOPHEA Tel: 011 866 886**	
54	61610	CHHENG SEYHA	M	**Development of a Web-Based Smart Hotel Booking and Management System** 1. What system requirements are necessary to support online hotel booking and effective hotel management? 2. How can a smart hotel booking and management web application be designed and implemented using modern web technologies? 3. How does the proposed web-based system improve hotel operations and customer experience compared to traditional booking and management methods?			

55	57336	CHHIN DARO	M	**Development of a Web Application for an Online Ticket Booking System: Rith Mony Express** 1. What hardware and software system requirements are necessary to support an online ticket booking system and ensure efficient management of Rith Mony Express operations? 2. How can an online ticket booking system be effectively designed and implemented, including the selection of suitable technologies, tools, and system architecture? 3. How does the proposed online ticket booking system enhance operational efficiency and customer satisfaction compared to traditional manual ticketing methods, and what is the system workflow?	6	**Mr. THINH SOPHEA** **Tel: 011 866 888**	
56	57686	CHHUNLY SEYHA	M	**Mobile Learning Apps for Remote Areas: A Feasibility Study** 1. What are the technological and infrastructural barriers to implementing mobile learning apps in remote areas? 2. How do students and educators in remote areas perceive the usefulness and usability of mobile learning apps? 3. What features and content types make mobile learning apps most effective for learners in remote or underserved regions?	6		
57	56950	HAM KIMSENG	M	**Development of a Web-Based Hotel Management System for Phnom Penh** 1. What are the essential technological frameworks and software architectures required to develop a scalable Hotel Management System (HMS) for the Phnom Penh market? 2. How can the implementation of a web-based HMS enhance operational efficiency compared to traditional paper-based or manual record-keeping systems? 3. In what ways can this system improve guest satisfaction and strengthen the competitive positioning of hotels in Phnom Penh?			
58	57598	HEANG MAKARA	M	**Development of a Windows Forms Application for a Contract Loan Management System** 1. What core features are required in a Windows Forms–based contract loan management system to effectively manage customer information, loan contracts, and payment schedules? 2. Which technologies and system architecture are most suitable for designing and implementing a secure, efficient, and user-friendly Windows Forms contract loan management system? 3. How can the proposed Windows Forms–based contract loan management system improve loan accuracy, operational efficiency, and financial record management compared to manual or traditional loan management methods?			

59	57947	HEM SOPANHA	M	**Design and Development of FoodHub: A Multi-Vendor Restaurant Web Application to Enhance Restaurant Visibility and Customer Pre-Ordering Experience** 1. How can a multi-vendor web application be designed to enable restaurant owners to easily register, manage menus, and receive customer orders? 2. How can a multi-vendor restaurant web platform help customers reduce uncertainty about restaurant prices, menus, ratings, and service flow before visiting? 3. How can a centralized digital platform support restaurant owners in promoting their businesses while improving customer trust and decision-making?	6	**Mr. THINH SOPHEA** **Tel: 011 866 892**	
60	57123	HOENG MENGDY	M	**Development of a Web-Based Restaurant Table Booking System** 1. What core features are required in a web-based restaurant table booking system to efficiently manage table reservations, customers, and time slots? 2. Which technologies and system architecture are most suitable for designing and implementing a scalable and efficient web-based restaurant table booking system? 3. How can a web-based restaurant table booking system improve reservation accuracy, operational efficiency, and customer experience compared to manual or traditional booking methods?			
61	57952	HONG VANNDETH	M	**Design and Deployment of an Online Hotel Reservation System** 1. What hardware and software system requirements are necessary to support an online hotel reservation system and ensure efficient management of hotel operations, including user mangement? 2. How can an online hotel reservation system be effectively designed and implemented, including the selection of suitable technologies for appropriate tools and system architecture? 3. How does the proposed online hotel reservation system enhance operational efficiency and customer satisfaction compared to traditional manual booking methods, and what is the system workflow?			
62	56333	HORM SOPHORN	M	**Development of a Web-Based E-Mart Inventory Management System** 1. What are the core features required in a web-based E-Mart inventory management system to effectively manage products? 2. Which technologies and system architecture are most suitable for designing and implementing a scalable and efficient web-based E-Mart inventory management system? 3. How can the proposed web-based E-Mart inventory management system improve inventory accuracy, operational efficiency, and decision-making compared to manual or traditional systems?			

63	57864	HORN SAMOLRITHTHIKUN	M	**Development of a Rental Management System (Motorcycle/Bicycle) for Angkor Rental** 1. What are the essential hardware and software requirements needed to develop and operate a rental management system for motorcycle and bicycle rentals at Angkor Rental? 2. How can a web-based rental management system be effectively designed and developed to manage motorcycles, bicycles, customers, rentals, and returns? 3. How does the developed rental management system help Angkor Rental manage rental operations more efficiently and accurately compared to the existing manual system?	6	**Mr. THINH SOPHEA** **Tel: 011 866 896**	
64	56943	KENG SOKHOUR	F	**Development of a Web-Based POS System for Mini Mart Using ReactJS and Restful API in Laravel** 1. How can a web-based POS system improve the efficiency of sales transactions in a retail shop? 2. What are the essential features needed in a POS system developed using React and Laravel? 3. What is the impact of the system on inventory management and sales reporting accuracy?	7	**Mr. PHOEUNG CHANNA** **Tel: 085 444 440**	
65	56875	KHEANG MENGLY	M	**Development of a Web-Based POS System for a Restaurant (Including Food and Coffee Beverages) Using Laravel Framework** 1. How can a web-based POS system improve the efficiency of managing food and coffee beverage orders in a restaurant ? 2. What essential features should a web-based POS system include to effectively manage food items, coffee beverages, payments, and sales data in a restaurant ? 3 . What is the impact of implementing a Laravel-based POS system on data accuracy, operational efficiency, and customer service in a restaurant environment ?			
66	56996	LEE SHEERLONG	M	**Developing a Web-Based POS and E-Commerce System for Sheerlong Electronics Using ReactJS and Laravel** 1. How do web-based POS and micro-e-commerce systems streamline workflows in electronics retail? 2. How do automated features like Telegram notifications and digital receipts improve efficiency and reduce errors? 3. How does the system ensure accurate inventory and prevent stock discrepancies?			
67	56790	LIM CHEAHENG	M	**Web-Based Restaurant Management System Using Laravel with Inventory and Sales Analytics** 1. What are the main features of web-based restaurant management system? 2. How does an RMS handle order management, inventory tracking and sale Analytics? 3. How can a web-based restaurant management system provide useful reports and analytics for business growth?			

68	58029	LUY SREYPICH	F	**Development of a Web-Based Hotel Booking and Management System Using Laravel** 1. What are the main features required in a web-based hotel booking and management system? 2. How does the system manage room booking, customer information, and payments? 3. How can reports and analytics help hotels improve service and occupancy?	7	**Mr. PHOEUNG CHANNA** **Tel: 085 444 444**	
69	57395	LY FANAU	M	**Development of a Web-Based Project and Task Management System Using Java Spring Boot and Next.js** 1. How can a web-based project and task management system (Zentrio) help solve existing challenges in organizing tasks, tracking progress, and managing team collaboration? 2. What are the essential features that a web-based project and task management system should include to improve team productivity and project efficiency? 3. What is the impact of implementing the Zentrio system on project management efficiency, task completion performance, and team communication?			
70	56657	LY KHEMARIN	M	**Development of a Web-Based POS System for a School Library Using ReactJS and Laravel** 1. How does a web-based POS system improve the efficiency of book borrowing and returning in a school library? 2. How do automated features such as digital borrowing slips and overdue notifications reduce errors and improve workflow? 3. How does the system ensure accurate tracking of book inventory and prevent missing or duplicate records?			
71	53085	MEN CHANSETHY	M	**Development of a Web-Based POS System to Improve Operational Efficiency in Coffee Stores using ReactJS and Laravel** 1. How can a web-based POS system improve operational efficiency and speed of sales transactions in coffee stores? 2. What are the essential features required in a web-based POS system for coffee stores developed using ReactJS and the Laravel framework? 3. What is the impact of implementing a web-based POS system on inventory control and sales reporting accuracy in coffee stores?			
72	53511	MUON CHETRA	M	**Development of a web-based e-commerce management system Using C# with ASP.NET** 1. How can a web-based e-commerce management system developed using C# and ASP.NET improve order processing efficiency and inventory control for small to medium-sized businesses? 2. How effective is an ASP.NET-based e-commerce management system in automating product management, order tracking, and customer management processes? 3. How does the usability and responsiveness of an ASP.NET-based e-commerce management system affect customer satisfaction and purchasing behavior?			

73	57757	NAM TOLA	M	**Development of a Web-Based Blog Management System** 1.What are the main features required in developing a web-based blog management system, such as blog post creation, editing, deletion, category management, and commenting? 2.How can different user roles (such as administrator, author, and reader) be managed to control access and permissions in the blog management system? 3.What are the benefits of implementing a web-based blog management system in improving content organization, information sharing, and management efficiency?	7	**Mr. PHOEUNG CHANNA** **Tel: 085 444 449**	
74	58070	NGIN KANHCHANA	F	**Build a Student Attendance Management System for BELTEI International University** 1. How can a student attendance management system improve the tracking of student attendance at BELTEI International University? 2. What key features are required to build an effective student attendance management system for both students and lecturers? 3. How does implementing a digital attendance system support academic management and decision-making at BELTEI International University?	8	**Mr. THY SOTHEA** **Tel: 061 333 191**	
75	57163	NHANH KIMSON	M	**Build a Digital Lost & Found System for BELTEI International University** 1. What are the benefits of this system for BELTEI International University and its students? 2. Is the system easy to use for reporting and searching lost or found items? 3. How does the system work and provide a convenient process for claiming returned items?			
76	56470	PANN SOTHEA	M	**Design and Implementation of a Stock Management System for Small and Medium-Sized Enterprises** 1. What problems do small and medium-sized enterprises face when managing stock using manual or existing systems? 2. How can a stock management system be designed and implemented to solve these stock management problems in small and medium-sized enterprises? 3. How does the use of the developed stock management system improve stock control, efficiency, and decision-making in small and medium-sized enterprises?			
77	57563	PHI BUNLI	M	**Blood Donor Management System** 1. What is the value of this system for the community? 2. Are donors able to find what they need easily on the website? 3. How does the system work to provide a seamless experience?			

78	56436	PRAK PORSANN	M	**Design and Implementation of a Web-Based Inventory and Sales Management System for Trading Co., Ltd** 1. What are the benefits of this system for Trading Co., Ltd., including its staff and sales operations? 2. Is the system easy to use for managing inventory, tracking stock, and processing sales transactions? 3. How does the system improve efficiency and support decision-making in both inventory management and sales processes?	8	**Mr. THY SOTHEA** **Tel: 061 333 195**	
79	56927	REACH CHIVORN	M	**Hotel Management Systems (HMS - Hotel)** 1.How Does a Hotel Management System Optimize Room Booking and Reservation Processes? 2.What Are the Challenges of Integrating with Third-Party Online Travel Agencies (OTAs) in an HMS? 3. Which Module Is Most Important for Front Desk Operations and Guest Check-in/out in an HMS?			
80	57225	RUOS THANUT	M	**Development of Book Information System with External Links to Free Digital Libraries** 1. How can a book information system be developed to provide users with easy access to external link of free digital libraries? 2. Dose the system help users find book information and free digital library links efficiently? 3. How usable and user friendly is the book information system for accessing free digital books?			
81	57693	SEAK MENGLY	M	**Design and Development of a Mobile Hotel Booking Application for Cambodia** 1. How does a mobile hotel booking application support travelers in Cambodia when planning and managing hotel reservations, and how can it contribute to promoting tourism in Cambodia? 2. Does the application provide clear and sufficient hotel information to help users make booking decisions? 3. How effective is the application's interface in guiding users through the hotel selection and booking process?			
82	57250	SNA PANHASAL	M	**Build an Exam Management and Result Processing System for BELTEI International University** 1. How can an exam management system improve the organization and administration of exams at BELTEI International University? 2. What key features are required to build an effective exam and result processing system for both students and lecturers? 3. How does implementing a digital exam and result system support accurate grading and academic decision-making at BELTEI International University?			

83	57516	SOK NORA	M	**Development of a Mobile-Based Course Evaluation and Feedback System for BELTEI International University** 1. How can a mobile-based course evaluation system address the limitations of traditional paper-based feedback methods at BELTEI International University? 2. What are the essential features and functionalities required for developing an effective mobile-based course evaluation and feedback system for educational institutions? 3. How does the implementation of a mobile-based feedback system improve the quality of course evaluation data and support academic decision-making at BELTEI International University?	8	**Mr. THY SOTHEA** **Tel: 061 333 200**	
84	57969	SROUCH SREAN	M	**Design and Development of a Web-Based Student Information Management System for BELTEI International University** 1. What are the limitations of the current student information management process at BELTEI International University, and how can a web-based system address these limitations? 2. How can a web-based student information management system be designed and developed to improve data accuracy, accessibility, and efficiency for students, lecturers, and administrators? 3. What is the impact of the implemented web-based student information management system on administrative efficiency and user satisfaction at BELTEI International University?			
85	57645	THON BUNLENG	M	**Development of a Mobile Application for Online Clothing Sales and Shop Management** 1. What challenges do small clothing shop owners face when selling products using traditional in-store methods only? 2. How can a mobile shopping application improve customer convenience and increase sales opportunities? 3. What system features are necessary to support online ordering, inventory management, and sales reporting?	9	**Dr. HO MONY** **Tel: 012 603 314**	
86	57401	UN PHEASA	M	**Development of a Phone Shop Management Web-Based Application Using Angular and Spring Boot** 1. How can Angular and Spring Boot be effectively integrated to develop a secure, scalable, and maintainable web-based phone shop management system? 2. To what extent does the developed system support efficient management of inventory, sales transactions, and user roles in a phone shop environment? 3. What impact does the web-based phone shop management system have on operational efficiency, data accuracy, and user satisfaction compared to traditional manual methods?			

87	54507	VANNAK FIANNAN	M	**Inventory Management System using Python and Oracle Database** 1. How can an Inventory Management System be designed using Python and Oracle Database to efficiently manage inventory data? 2. How can the system improve the accuracy of stock records compared to manual inventory methods? 3. How can database design in Oracle improve data integrity and consistency in inventory management?	9	**Dr. HO MONY** **Tel: 012 603 316**	
88	56850	VAT SOKSAVEN	M	**Development of a Web Application for Bus Ticket Booking and Administration Using Laravel and MySQL** 1. How can users search and book bus tickets easily based on route, date, and time? 2. How will the system manage bus information, schedules, and seat availability to avoid double booking? 3. How can administrators monitor bookings and generate sales reports efficiently?			
89	56383	YORN SOMNANG	M	**Development of an E-Commerce Website Using Modern Web Technologies** 1. How can a responsive and interactive design improve user engagement and accessibility across various digital devices? 2. In what ways does a centralized backend system and API integration streamline the processing of complex business logic and data exchange? 3. To what extent does a structured relational database ensure the accuracy, organization, and integrity of critical business information?			
90	57278	YOUN SOKHOUR	M	**Usability Evaluation of Augmented Reality–Based User Interfaces** 1. How does augmented reality–based user interfaces affect task efficiency and error rates compared to traditional 2D interfaces? 2. What usability challenges do users commonly experience when interacting with AR-based user interfaces ? 3. How do user factors (such as experience with AR or technical skills) influence the usability and user satisfaction of AR interfaces?			
91	55826	ANN CHAMNAN	M	**Development of Web-Based Student Information Management System** 1. How can the implementation of a centralized database improve the organization and accessibility of student profiles, academic departments, and enrollment records? 2. In what ways does an automated tracking system enhance the management and reliability of student attendance and grading processes? 3. To what extent does the digital integration of records improve data accuracy, processing speed, and information security compared to manual methods?			

92	55972	BEN PANHA	M	**Web-Based Inventory Management System Development for Small and Medium Enterprises (SMEs)** 1. What challenges do Small and Medium Enterprises (SMEs) face in managing inventory using manual or traditional systems? 2. How can a web-based inventory management system improve the efficiency and accuracy of inventory control in SMEs? 3. What are the benefits of using a web-based inventory management system compared to traditional inventory management methods for SMEs?	9	**Dr. HO MONY** **Tel: 012 603 321**	
93	61784	BET CHAMNAN	M	**Development of a Sales Management System for Small and Medium Enterprises (SMEs)** 1. What problems do small shop owners face when managing inventory and sales manually? 2. How can an Inventory and Sales Management System improve transaction accuracy and business efficiency? 3. What system features are necessary to effectively manage products, sales, and reporting?			
94	61780	BOTH SOKHEANG	M	**Development of a Web-Based POS Management System for Retail Stores** 1. How does the integration of an automated system impact the efficiency and accuracy of sales transactions and inventory management? 2. In what ways can a centralized digital platform improve the organization and accessibility of customer and employee data? 3. How do user interface design and the support for diverse payment methods influence the overall user experience for both staff and customers?			
95	61779	CHEA PHANIT	F	**Developing a Mobile App for Tracking Student Attendance and Lecturers at BELTEI International University** 1.What are the benefits of using a mobile-based digital attendance tracking system for university students and lecturers? 2.What challenges do students and lecturers face with manual attendance, and how can a mobile attendance application address these challenges? 3.What mobile-app features are most important to ensure attendance accuracy, fairness, and ease of use in a university setting?	10	**Mr. SETHA RICHARD** **Tel: 095 589 859**	
96	61781	CHHEN VICHHEKA	F	**Developing a Database Management System for Managing a Salon Shop** 1. What are the benefits of using a Salon Shop Management System for managing salon services, customers, and payments? 2. What challenges do salon owners and staff face when managing salon operations manually? 3. What system features are most important to ensure efficient appointment scheduling, and better customer service in a salon?			

BELTEI INTERNATIONAL UNIVERSITY

97	55750	CHHIM KIMHENG	M	**Design and development management system for coffee shop** 1. How does the implementation of a coffee shop management system integrate order processing, inventory management, and sales reporting to improve overall operational efficiency? 2. What system functionalities and database design components are required to optimize staff workflow, ensure data accuracy, and enhance customer service in a coffee shop management system? 3. What extent does a digital coffee shop management system improve system performance, data management, and decision-making compared to traditional manual operations?	10	**Mr. SETHA RICHARD** **Tel: 095 589 859**	
98	61777	CHHOEUNH CHHINKEO	M	**Design and Development of a Smart Library Management System** 1. How can a Smart Library Management System improve the efficiency of book borrowing and returning compared to a traditional library system? 2. What system features and UX/UI design elements are most effective in enhancing user satisfaction for librarians and students? 3. How does the implementation of a web-based Smart Library Management System affect data accuracy and report generation in library operations?			
99	61786	CHHUN SENGHAK	M	**Designing and Developing a Mobile App to Promote Khmer Farmers' Marketplace** 1. How can a Khmer Farmers' Marketplace mobile application help farmers independently access markets and sell their agricultural products? 2. How can a local farmer community within the mobile application support both professional knowledge sharing and collaborative production among farmers? 3. How can the mobile application improve accessibility for businesses and investors in sourcing agricultural products?			
100	61790	CHIN SEREYPUTHIREACH	M	**Design and Development of a Web-Based Platform for Sharing and Promoting Travel Destinations in Cambodia** 1. What are the benefits of a web-based platform for sharing information about travel destinations in Cambodia for local and international tourists? 2. What challenges do travelers face when searching for reliable travel information, and how can a community-based travel website address these challenges? 3. What website features are most important to ensure usability, accuracy of information, and user engagement when promoting travel destinations in Cambodia?			
101	53273	EAB PUTH	M	**Developing the SmartToy Store Mobile App to Enhance Customer Experience in Purchasing Toys** 1. What features should be included in a SmartToy Store app to meet the needs of parents and children? 2. Which technologies and programming languages are most suitable for developing a mobile e-commerce app? 3. When should the app offer promotions or discounts to attract more buyers?			

102	56688	HEANG MENGHAK	M	**Design and Development of a Student Attendance System** 1. How can a digital attendance system improve the efficiency and accuracy of recording student attendance compared to manual methods? 2. What challenges do teachers and administrators face in managing and tracking student attendance, and how can a software system address these challenges? 3. What features are most important to ensure the system is user-friendly, reliable, and effective for both teachers and students?	10	**Mr. SETHA RICHARD** **Tel: 095 589 859**	
103	57807	HORT RANUT	M	**Developing a Mobile Learning Application for High School Students** 1. What are the benefits of using a mobile learning application for high school students and teachers? 2. What challenges do students and teachers face with traditional learning methods, and how can a mobile learning application help address these challenges? 3. What mobile application features are most important to support effective learning, student engagement, and ease of use in a high school environment?			
104	56671	KHON SREYMOM	F	**Design and Development of an Online Library Management System** 1. What are the benefits of using an online library management system for students and librarians? 2. What problems do libraries face when using manual or traditional library management methods? 3. What system features are important to ensure ease of use, accurate book management, and efficient library services?			
105	57220	LOV PENGHORT	M	**Learning Management System App** 1. How does the implementation of a Learning Management System (LMS) app influence student academic performance and the quality of teacher-student interaction in a digital learning environment? 2. What are the critical factors influencing the adoption of LMS applications among students and educators, and what technical barriers hinder their full engagement with the platform? 3. Which core features and functionalities are essential for an LMS app to effectively support mobile learning (m-learning) and meet the specific educational needs of the local institutional context?	11	**Mr. HENG SOCHEAT** **Tel: 096 666 6695**	
106	57130	LY KIMCHHAY	M	**Core Inventory Management Systems** 1. How does a software-based inventory management system improve stock accuracy, operational efficiency, and decision-making in small to medium enterprises (SMEs)? 2. What impact does inventory automation—such as automated reorder levels, role-based access control, and audit logging—have on reducing stock shortages, overstocking, and human error in inventory operations? 3. Why does system architecture choice (monolithic vs microservices) matter for scalability, performance, and long-term maintainability in multi-warehouse inventory management systems?			

107	61788	MAI SAMORN	F	**Stationery System for Material Management at Beltie University** 1. How is stationery tracked at Beltie University? 2. What's the process for ordering and distributing stationery? 3. Why is the stationery material managed by this specific person/department at Beltie University?	11	**Mr. HENG SOCHEAT** **Tel: 096 666 6695**	
108	55898	MEAN RITHCHANPHEAKDEY	M	**Home protection system** 1. How can the system implement a "Deter-Detect-Delay" framework using smart sensors, perimeter lighting, and automated locks to prevent unauthorized entry? 2. What are the most effective real-time notification strategies to minimize false alarms while ensuring high-priority alerts reach both the homeowner and emergency services instantly? 3. How can the system maintain operational integrity during power outages or internet disruptions (e.g., using redundant power sources and local vs. cloud storage)?			
109	58178	MEN SERYOUDOM	M	**POS Bookstore** 1. How does a POS system help a bookstore manage inventory and track book sales efficiently? 2. What features should a bookstore POS system have to improve customer checkout and billing? 3. How can using a POS system help a bookstore analyze sales trends and customer preferences?			
110	61789	MOEUN CHANDY		**Leave Management System** 1. How can the Leave Management System simplify the leave request and approval process for employees and managers? 2. What information should the system store for each leave request to ensure proper tracking and transparency? 3. What notifications and alerts should the system provide to keep employees and managers updated about leave status and upcoming absences?			
111	61782	NAY DANY	F	**High School Attendance Management System** 1. What key objectives should the High School Attendance Management System achieve to improve efficiency and accuracy? 2. How should the system capture, store, and manage daily attendance statuses (Present, Late, Absent, Excused) to ensure reliable tracking for each student by class, date, and subject/period? 3. What reports and features should the system provide(monthly/class summaries, individual attendance history) to support teachers and administrators monitor attendance and take timely action?			
112	58263	OEURN SOVANNRATHANA	M	**PhoneShop Management System** 1. How can a Phone Shop Management System improve the efficiency of sales, inventory, and customer management compared to the manual system? 2. What system features are required to effectively manage phone products, suppliers, sales transactions, and stock control in a phone shop? 3. How does the implementation of a Phone Shop Management System affect accuracy, time consumption, and error reduction in daily shop operations?			

113	61776	PHUNG DYNA	F	**POS for E-Mart** 1. What impact does a POS system have on inventory management and stock control in an E-mart? 2. How does a POS system enhance customer satisfaction and checkout experience in an E-mart? 3. How does implementing a Point of Sale (POS) system improve transaction efficiency and accuracy in an E-mart?	11	**Mr. HENG SOCHEAT** **Tel: 096 666 6695**	
114	56059	POV SOKSITHI	M	**Inventory Management System** 1. How can an Inventory Management System improve the efficiency of tracking and managing products in a business? 2. What are the key features that make an Inventory Management System effective and user-friendly? 3. How does the integration of a database ensure accurate inventory tracking and reporting?			
115	57158	ROM KHUNNARY	F	**Web-Based Parking Management System for BELTEI International University** 1. What problems exist in the current parking system at BELTEI International University? 2. How can a web-based parking management system help manage parking spaces more efficiently? 3. How effective is the proposed system in improving parking management and user experience?	12	**Mr. LENG BORA** **Tel: 010 277 543**	
116	61797	SAMRITH RATH	M	**E-Library for BELTEI International University** 1. What challenges and limitations exist in the current library management system that can be addressed through an E-library system? 2. How do users (students and librarians) interact with the existing library system, and what difficulties do they encounter during these interactions? 3. What functional requirements are necessary for designing an effective and user-friendly E-library system?			
117	61778	SAROEUN KHAV	M	**Web-Based Student Project Showcase for IT Students in BELTEI International University** 1. Why project showcasing matters for students' future careers? 2. How can a web-based student project showcase platform help IT students display their projects and receive feedback from lecturers, seniors, and professionals? 3. What are the benefits of a web-based project showcase system for improving students' learning motivation, project quality, and academic visibility at BELTEI University?			
118	56091	SEANG VENGMENG	M	**Design and Implementation of a Web-Based Video Learning Platform for BELTEI International University with Role-Based Access Control** 1. How can a web-based video learning platform be designed to support video-based teaching and learning activities at BELTEI International University? 2. How can role-based access control be implemented to manage video access for different user roles such as students, teachers, and administrators at BELTEI International University? 3. To what extent does the proposed system improve the management and accessibility of video learning resources within BELTEI International University?			

119	61785	SIN SOPANHA	M	**Trip Management System for BELTEI International University** 1. Why does the BELTEI International University need a student trip management system? 2. How does Trip management system helps BELTI International University to resolve the problems or challenges that used to faced like the traditional process of management trip? 3. What are the features and functional requirements are exist in the Trip management system for the BELTI International University app for development and use cases?	12	**Mr. LENG BORA** **Tel: 010 277 543**	
120	55302	SONG KIMSOUR	M	**Stuff Management System at BELTEI International University** 1. What are the main functions of a staff management system at BELTEI International University, and how does it improve administrative efficiency? 2. How does the staff management system help BELTEI International University manage staff records, attendance, and performance evaluation? 3. What challenges might BELTEI International University face in implementing a staff management system, and what solutions can be proposed?			
121	61802	TENG SOKPHORN	F	**Student Exam System for BELTEI International University** 1. Why need make a Student Exam System for BELTEI University? 2. How can a Student Exam System help for manage the whole of result of students for BELTEI University? 3. What are the benefits and entire exam lifecycle of Student Exam System at BELTEI University?			
122	61609	THOEUN SOKHENG	M	**Elephant Tour Booking System Web Application at Mondulkiri** 1. How can the Elephant Tour Booking System make booking and daily work easier than manual methods? 2. How does the system help local and international tourists book tours more easily? 3. How can the system help protect elephants and support responsible tourism in Mondulkiri?			
123	56196	VA MENGLY	M	**Web-Based Attendance Management System for BELTEI International University** 1. What is a web-Based Attendance Management System for BELTEI International University? 2. Who are the main users of the system? 3. What are the main benefits of using this system compared to the manual attendance system?			
124	61803	VORN SAVORN	F	**BELTEI International School Integrated Management System** 1. How can BELTIE Internatinal School Management System improve administrative efficiency compared to traditional manual processes? 2. In what ways can the system enchance communication between teacher, Students, And parents? 3. What measurable impact does the system have on student learning outcom and overall school performance?			

BELTEI INTERNATIONAL UNIVERSITY BELTEI INTERNATIONAL UNIVERSITY BELTEI INTERNATIONAL UNIVERSITY BELTEI INTERNATIONAL UNIVERSITY

125	61783	YOEM SREYYOER	F	**Alumni Social Network System for BELTEI International University** 1. What challenges does BELTEI International University currently face in managing and engaging its alumni community? 2. How does BELTEI International University currently communicate with its alumni after graduation? 3. How can the system support alumni contributions through mentorship and donations?	12	**Mr. LENG BORA** **Tel: 010 277 543**	

Notes:

1. Meeting with all Supervisors: **February 06, 2026**
2. Seminar/Orientation with Supervisors and Students: **March 30, 2026**
3. Due date for Research Proposal Paper (3 chapters) Submission: **May 25, 2026**
4. Due date for Research Progressive Paper (6 chapters) Submission: **July 06, 2026**
5. Due date for BA-Thesis and Defense Slides Submission: **November 10, 2026**

Phnom Penh, Date: 03/03/2026

President

LY NAVUTH
