BELTEI INTERNATIONAL UNIVERSITY
贝 蒂 国 际 大 学
The Future of Global Leaders

លេខ: 236/26 .....សបអ

Campus 2

FACULTY OF INFORMATION TECHNOLOGYAND SCIENCE
Bachelor of Information Technology and Science in Computer Networking and Cyber Security (BIT-CNCS)
National Program (Batch VI, 1st Intake)
LIST OF SUPERVISORS AND SUPERVISEES

№	ID	NAME IN LATIN	SEX	RESEARCH TOPIC AND QUESTIONS	GROUP	SUPERVISOR	OTHERS
1	56615	CHHON SEAKLENG	M	**The Role of Firewalls and Intrusion Detection in Business Continuity During Cyber Attacks at BELTEI Group** 1. How do firewalls help prevent cyber attacks that threaten business operations? 2. What role do intrusion detection systems play in detecting and responding to attacks? 3. How do these security measures support business continuity planning?	1	**Mr. SIN BUNTHOEUN Tel: 087 929 167**	
2	56667	EAT SING	M	**The Impact of Natural Disasters on Network Infrastructure and Recovery Techniques Using Backup Technology in BELTEI Group** 1. What types of damage can natural disasters cause to network infrastructure? 2. Why is network recovery important after a natural disaster? 3. How do natural disasters disrupt network infrastructure?			
3	57106	ENG YOUNITH	M	**Deploying and Managing a Proxmox Server Cluster: A Case Study in VET Logistics Co., Ltd** 1. How can a Proxmox HA cluster handle a single node failure? 2. How can open source monitoring solutions such as Prometheus and Graphana proactively detect issues? 3. How can open source notification services such as Gotify alert administrators when problems arise?			
4	57050	HO MENGHOUR	M	**IT Asset Management Challenges During Remote Work and Hybrid Environments Using Snipe-IT: A Case Study in BELTEI Group** 1. What are the main challenges organizations face when using Snipe-IT to track and manage IT assets in remote and hybrid work settings? 2. How effective is Snipe-IT in maintaining asset visibility, security, and compliance when employees work remotely or in hybrid models? 3. What strategies or improvements can help overcome the limitations of Snipe-IT for IT asset management in distributed work environments?			

5	56647	HOEUN PHIRUN	M	**Ransomware Recovery Strategies for Educational Institutions: A Case Study in BELTEI International University Campus 2** 1. How can university recover their data after a ransomware attack? 2. What steps should a university take to get back to normal after ransomware hits its systems? 3. How can educational institutions protect important student and staff information during recovery?	1	**Mr. SIN BUNTHOEUN Tel: 087 929 171**	
6	56603	HORN OUDOM	M	**Network Security (Improve Network Performance Using Fortigate Firewall in BELTEI International University Campus 2** 1. How does implementing a FortiGate firewall affect network performance and security at Beltie University UC2? 2. What are the main network issues (latency, bandwidth, threats) before and after deploying the FortiGate firewall? 3. Which FortiGate features (firewall rules, IPS, traffic shaping, web filtering) contribute most to improving network performance?			
7	57206	IT CIVUTHA	M	**Assessing Risks and Creating a Business Continuity Checklist for E-Commerce Websites** 1. How can e-commerce businesses prepare for unexpected system failures? 2. What are the major operational, technical, and security risks faced by e-commerce websites, and how do they impact business continuity? 3. How can risk assessment be used to develop an effective business continuity checklist for e-commerce platforms?			
8	56414	KHAI DICARE	M	**Using ITAM to Support Disaster Recovery and Business Continuity Planning Using GLPI: A Case Study of BELTEI International University Campus 2** 1. How can GLPI's IT asset management features be effectively utilized to identify, prioritize, and document critical IT assets in disaster recovery and business continuity plans? 2. What are the main benefits and challenges of integrating GLPI into organizational disaster recovery and business continuity planning processes? 3. To what extent does the use of GLPI improve asset recovery time, data accuracy, and overall resilience during disaster recovery and business continuity exercises?			
9	57552	KHON SONA	M	**Integrating Cyber Security Training into Business Continuity Plans: A Case Study in BELTEI Group** 1. How can cyber security training be effectively added to the main stages of business continuity plans? 2. What are the main challenges in adding cyber security training to business continuity plans, and how can they be addressed? 3. Does including cyber security training in business continuity plans improve employee responses and speed up recovery from cyber incidents?			

10	56640	KUON SOVANNARETH	M	**Developing a Basic Disaster Recovery Plan for Small Businesses Using Cloud Backups: A Case Study in BELTEI Group** 1. What types of disasters commonly affect small businesses? 2. What disaster recovery practices are currently used by small businesses? 3. How do cloud backup solutions support disaster recovery for small businesses?	1	**Mr. SIN BUNTHOEUN Tel: 087 929 176**	
11	56822	LORN JENJEN	M	**An Analysis of Zero Trust Architecture for Enterprise Networks: Case study of ACLEDA Bank** 1. What are the core principles of Zero Trust Architecture, and how do they differ from traditional perimeter-based enterprise network security models? 2. What enterprise network security challenges commonly faced by financial institutions are relevant to ACLEDA Bank, and how can Zero Trust Architecture address these challenges? 3. What are the potential benefits and limitations of implementing Zero Trust Architecture in the enterprise network environment of ACLEDA Bank?			
12	57733	MEAS PISETH	M	**Implementation of VLAN and IoT Security in Wireless Network Environment at BELTEI International University** 1. What is the role of VLAN segmentation in improving security for IoT devices in the wireless network at BELTEI International University? 2. What security methods can be implemented to protect IoT devices from cyber threats in a wireless network environment? 3. What is the effectiveness of VLAN and wireless security implementation in reducing security risks for IoT devices?	2	**Mr. CHUON NY Tel: 010 225 533**	
13	56328	NEM SOKNENG	M	**Enhancing Network Security Using FortiGate Firewall at KOFI Co., Ltd** 1. What security features of the FortiGate Firewall can enhance network security at KOFI Co., LTD? 2. What types of network threats can be prevented by implementing FortiGate Firewall security policies at KOFI Co., LTD? 3. What is the effectiveness of FortiGate Firewall implementation in improving network security performance at KOFI Co., LTD?			
14	56137	NGAN KIMSENG	M	**Implementation of Enterprise Cybersecurity Protection Using Kaspersky Endpoint Security for Business at Checkin ME Co., Ltd** 1. What cybersecurity threats can be mitigated by implementing Kaspersky Endpoint Security for Business at Checkin ME Co., Ltd? 2. What features of Kaspersky Endpoint Security for Business are most effective in protecting enterprise endpoints? 3. What is the impact of implementing Kaspersky Endpoint Security on the overall cybersecurity posture of Checkin ME Co., Ltd?			

15	56185	NHEL SAOHOUR	M	**Enhancing Enterprise Email Security and Management Using Microsoft Exchange Server at BELTEI International University** 1. What security features of Microsoft Exchange Server can be used to enhance email protection at BELTEI International University? 2. What management strategies can be implemented in Microsoft Exchange Server to improve email administration and user control? 3. What is the effectiveness of Microsoft Exchange Server in reducing email-based security threats and improving communication reliability at BELTEI International University?	2	**Mr. CHUON NY** **Tel: 010 225 536**	
16	56622	NOB BONLY	M	**Implementation and Management of Virtualized Infrastructure Using Microsoft Hyper-V at Royal Group Phnom Penh SEZ** 1. What are the key features of Microsoft Hyper-V that support the implementation of a virtualized infrastructure at Royal Group Phnom Penh SEZ? 2. What management strategies can be applied to optimize performance, security, and resource allocation in a Hyper-V virtualized environment? 3. What is the effectiveness of implementing Microsoft Hyper-V in improving server utilization, operational efficiency, and IT infrastructure management at Royal Group Phnom Penh SEZ?			
17	57689	NORN VANNET	M	**Designing and Implementing Ransomware Endpoint Protection Using ESET Endpoint Security at BELTEI International University** 1. What features of ESET Endpoint Security are most effective in protecting endpoints from ransomware attacks at BELTEI International University? 2. What strategies can be implemented to configure ESET Endpoint Security for optimal ransomware protection in an enterprise environment? 3. What is the effectiveness of deploying ESET Endpoint Security in reducing ransomware-related threats and improving endpoint security at BELTEI International University?			
18	55907	ORL SEYHA	M	**Enhancing Virtualization Security Management Using VergeIO Server at BELTEI International University** 1. What security features of VergeIO Server can be utilized to enhance virtualization security management at BELTEI International University? 2. What strategies can be implemented to manage and secure virtual machines effectively using VergeIO Server? 3. What is the effectiveness of VergeIO Server in improving virtualization security and reducing risks in the university's IT infrastructure?			
19	56262	PHAL RUNRITHYPANHA	M	**Virtualization Security Implementation Using Proxmox VE at KOFI Co., Ltd** 1. What Proxmox VE features can be utilized to implement effective virtualization security at KOFI Co., Ltd? 2. What strategies can be applied to secure virtual machines and manage access control in a Proxmox VE environment? 3. What is the effectiveness of implementing virtualization security using Proxmox VE in protecting KOFI Co., Ltd's IT infrastructure?			

20	56967	PHOM LANH	M	**Improving System Administration Efficiency Using Virtualized Infrastructure Based on VMware ESXi at Beltie BELTEI International University** 1. What VMware ESXi features can be utilized to improve system administration efficiency at BELTEI International University? 2. What strategies can be implemented to optimize management and performance of virtualized infrastructure using VMware ESXi? 3. What is the effectiveness of VMware ESXi-based virtualized infrastructure in enhancing system administration efficiency and reducing operational workload at BELTEI International University?	2	**Mr. CHUON NY** **Tel: 010 225 533**	
21	56103	PHUN SETHEARITH	M	**Design and Implementation of Site-to-Site VPN Connectivity for Branch Offices to Headquarters at BELTEI International University** 1. What VPN technologies and configurations can be used to establish secure site-to-site connectivity between branch offices and headquarters? 2. What strategies can be implemented to optimize performance and reliability of site-to-site VPN connections? 3. What is the effectiveness of the site-to-site VPN implementation in enhancing secure communication between branch offices and headquarters at BELTEI International University?			
22	55627	PISETH SOKBUNHENG	M	**Design and Implementation of Secure File Access and Data Protection Using Windows Server 2025 at SLJ Group** 1. What Windows Server 2025 features can be utilized to secure file access and protect sensitive data at SLJ Group? 2. What strategies can be implemented to manage permissions, access control, and data protection effectively using Windows Server 2025? 3. What is the effectiveness of implementing Windows Server 2025 in enhancing secure file access and data protection at SLJ Group?			
23	58106	REAN BEREY	M	**Implementation of Disaster Recovery Zone for Enterprise Network Infrastructure at DRSB Express** 1. What strategies and technologies can be implemented to establish an effective disaster recovery zone for enterprise networks at DRSB Express? 2. What measures can ensure data integrity, availability, and continuity in the disaster recovery zone? 3. What is the effectiveness of the disaster recovery zone in minimizing downtime and mitigating risks for the enterprise network at DRSB Express?			
24	58105	REAN SETHI	M	**An Assessment of Network Management and Control Mechanisms in the DRSB EXPRESS Group** 1. To what extent does the organization centrally monitor and control network components and services? 2. To what extent do centralized network management tools improve network performance, availability, and security? 3. What is the frequency of network management problems, and how effective are the implemented solutions in reducing these problems?	3	**Mr. SENG NOL** **Tel: 096 486 8496**	

25	57956	RIN PICHPOMLEU	M	**The Effectiveness of Digital Forensic Techniques in the Investigation of Social Engineering Attacks** 1. To what extent are digital forensic techniques effective in investigating social engineering attacks? 2. Which digital forensic tools demonstrate the highest effectiveness in detecting and analyzing social engineering evidence? 3. To what extent do technical, organizational, and human factors influence the effectiveness of digital forensic investigations?	3	**Mr. SENG NOL** **Tel: 096 486 8497**	
26	58262	SENG CHENDA	F	**An Empirical Analysis of Factors Affecting User Click Rates in a Phishing Simulation** 1. What is the phishing click rate across different student groups? 2. To what extent does security awareness training reduce phishing click rates (pre-training vs. post-training)? 3. To what extent do security awareness scores and academic year levels predict phishing click behavior?			
27	57533	SOM VANNEL	M	**The Impact of Transmission Distance on Wi-Fi Speed and Reliability** 1. What is the statistical link between the distance of transmission and the average Wi-Fi throughput (Mbps)? 2. To what extent does increasing transmission distance affect the Wi-Fi retransmission rate? 3. At what transmission distance does the Wi-Fi packet loss rate exceed a predefined acceptable threshold?			
28	56382	SUNG PHEAKTRA	M	**Implementation of Domain-Based Network Security Using Windows Server Active Directory** 1. To what extent does domain-based security using Active Directory reduce unauthorized access attempts and security incidents? 2. How effective is centralized authentication and authorization in improving network security performance? 3. What measurable security improvements result from applying Group Policy and access control mechanisms in a domain-based network?			
29	57175	THONG MENGSIENG	M	**Evaluating the Effectiveness of Security Awareness Training Using Pre- and Post-Intervention Measures** 1. Does security awareness training significantly improve participants' knowledge scores (pre-test vs post-test mean difference)? 2. Does security awareness training reduce risky behaviors (e.g., phishing link clicks, unsafe information sharing), measured by incident counts/rates before vs after training? 3. Which training format produces the highest retention score measured four weeks after training?			
30	58086	TIN SOVICHEA	M	**Wireless Network Optimization Using Wi-Fi 7 at BELTEI International University, Campus 2** 1. To what extent do environmental and technical factors affect wireless signal quality and network performance on campus? 2. How effective are interference mitigation techniques in improving Wi-Fi performance in densely populated campus environments? 3. What is the quantitative impact of deploying Wi-Fi 7 technologies on wireless coverage and network performance across the campus?			

31	56804	TOEM VANNAK	M	**Implementing and Securing an Organizational Mail Server in Vireak Buntham Express Co., Ltd** 1. What is a mail server, and what are the roles of its core components SMTP, POP3, and IMAP in supporting organizational email communication? 2. Why is email security important, and which protection mechanisms such as authentication, encryption, spam filtering, and anti-malware/antivirus are used to protect email systems? 3. How is a mail server installed and configured on a virtual machine, and how are departmental email accounts created and managed to enable secure email communication across departments?	3	**Mr. SENG NOL** **Tel: 096 486 8503**	
32	57421	VA LEANGHONG	M	**Implementing Zero Trust Network Architecture through VLAN Segmentation and Enhanced Security Controls in Enterprise Networks at BELTEI University** 1. To what extent does VLAN-based network segmentation reduce unauthorized access attempts and security incidents in a Zero Trust environment? 2. How effective are advanced security policies and controls in preventing unauthorized access within segmented enterprise networks? 3.What is the quantitative impact of implementing Zero Trust Network Architecture on overall network security performance?			
33	55906	VOEURN VUTHY	M	**An Assessment of Active Directory Organization and Management for User Access and Resource Sharing at BELTEI University, Campus 2** 1. To what extent does Active Directory improve the effectiveness of user authentication and access control to shared network resources? 2. How effective are group-based shared folders and mapped drives in improving file access efficiency and security in a file server environment? 3. What is the level of effectiveness of Active Directory in managing users, groups, and access control policies within the organizational network?			
34	55936	YANN SAMDY	M	**An Evaluation of Windows Active Directory and Firewall Security Implementation at BELTEI International University** 1. To what extent does Windows Active Directory improve user management efficiency and accuracy? 2. How effective are firewall security mechanisms in reducing unauthorized access attempts and network security incidents? 3. What is the quantitative impact of integrating Active Directory with firewall defenses on overall network security performance?			

35	55628	YENG NARAK	M	**A Comparative Analysis of Wi-Fi 5 and Wi-Fi 6 Performance in a Classroom Environment** 1. To what extent does average network throughput differ between Wi-Fi 5 and Wi-Fi 6 under varying user densities? 2. To what extent do Wi-Fi 5 and Wi-Fi 6 differ in RTT latency and packet loss as user density increases? 3. Which wireless standard provides greater fairness in bandwidth distribution, as measured by per-user throughput variance?	3	**Mr. SENG NOL** **Tel: 096 486 8507**	

Notes:

1. Meeting with all Supervisors: **February 06, 2026**
2. Seminar/Orientation with Supervisors and Students: **March 30, 2026**
3. Due date for Research Proposal Paper (3 chapters) Submission: **May 25, 2026**
4. Due date for Research Progressive Paper (6 chapters) Submission: **July 06, 2026**
5. Due date for BA-Thesis and Defense Slides Submission: **November 10, 2026**

Phnom Penh, Date: 03.../...03...../2026

President

LY NAVUTH
