Campus 2

FACULTY OF INFORMATION TECHNOLOGYAND SCIENCE
Bachelor of Information Technology and Science in Software Engineering (BIT-SE)
National Program (Batch VI, 1st Intake)
LIST OF SUPERVISORS AND SUPERVISEES

№	ID	NAME IN LATIN	SEX	RESEARCH TOPIC AND QUESTIONS	GROUP	SUPERVISOR	OTHERS
1	57669	CHEM SAMON	M	**POS Mart System for Efficient Retail Sales Management** 1. How effective is a POS Mart System in improving retail sales efficiency? 2. How does a POS Mart System help manage inventory accurately in retail stores? 3. How can sales reports generated by a POS Mart System support better management decisions?	1	**Mr. RIN CHETRA** **Tel: 061 444 026**	
2	57704	HENG TANGLY	M	**POS Food Ordering System for Fast Restaurant Operations** 1. How can a POS food ordering system help a fast restaurant operate more efficiently? 2. How does an online movie booking system make seat reservations easier for customers? 3. How can a POS mart system help manage sales and inventory in a retail store?			
3	57993	KAK CHANPHIROM	M	**POS Restaurant System for Efficient Order and Sales Management** 1. How does a POS restaurant system help improve order processing and sales efficiency? 2. What features of the POS system help restaurant owners monitor sales, inventory, and daily reports more efficiently? 3. In what ways can the POS restaurant system enhance customer satisfaction and overall business performance?			
4	57705	LYHOUN LYHENG	M	**POS System for Construction Materials Depot Management** 1. How can a POS system improve sales and inventory management in a construction materials depot? 2. How does a POS Mart system help retail stores manage daily sales more efficiently and reduce errors? 3. How can an online shopping website improve customer convenience and increase product sales?			
5	56836	NHEAN PHEARAK	M	**Design and Development of a Web-Based Management Information System (MIS)** 1. What problems do organizations face when managing inventory using manual or semi-manual systems? 2. How can a web-based management information system improve inventory control and data management efficiency? 3. What features should be included in a web-based inventory management system to meet organizational needs?			

6	58008	PON CHANLY	M	**Online Product Ordering Website System** 1. How can an online product ordering website system improve the ordering process and customer satisfaction? 2. How does an online drink pickup and delivery application help reduce waiting time and improve service efficiency? 3. How can a POS Mart system improve retail sales management and inventory control?	1	**Mr. RIN CHETRA** **Tel: 061 444 036**	
7	57891	SAN SOTHIP	M	**The Company Uses a Loan Payment Calculator System to Help Employees and Customers Estimate Monthly Loan Repayments** 1. What is a Loan Payment Calculator? 2. Why is a Loan Payment Calculator important? 3. What information is required to calculate a loan payment?			
8	58037	SEM SELA	M	**Design and Development of a Web-Based E-Commerce System with Secure Online Payment and Order Management** 1. How can a web-based e-commerce system be designed to allow users to browse, order, and purchase products online? 2. How effective is the system in improving payroll management efficiency in an organization? 3. How effective is the system in reducing booking errors and waiting time?			
9	55901	SOEUN SEANG HENG	M	**Point of Sale Management System for Coffee Shops and Restaurants** 1. Why do coffee shops and restaurants have difficulties managing orders, payments, and daily sales records efficiently without a proper POS system? 2. Why do small and medium retail marts find it hard to manage inventory, sales, and reports accurately without an integrated POS system? 3. Why is it difficult for organizations to accurately track employee attendance and performance using manual or traditional systems?			
10	57015	TANG SONILA	F	**How can an integrated POS system improve product sales and inventory control?** 1. How can an integrated POS system improve product sales and inventory control? 2. What problems occur when sales and inventory systems are not integrated? 3. How does system integration reduce product shortages and sales errors?			
11	58192	THAI EHORN	F	**Coffee POS System Menu Management for Sale** 1. Why do coffee shops need a POS system and What problems does a Coffee POS System solve in daily operations? 2. How does a Coffee POS System handle customer orders? 3. What are the main components of a Coffee POS System?			
12	57374	TIN NARONG	M	**University Library Management System** 1. How will your code handle two different users trying to "Check Out" the last physical copy of the same book at the exact same time? 2. How will your system handle retroactive changes, such as an admin correcting a missed "Clock In" from three days ago after the payroll has already started processing? 3. How do you guarantee that a money transfer is "Atomic"—meaning if the system crashes after deducting money from the sender but before adding it to the receiver, the money is automatically returned?			
13	53815	PHOEUT SOPHEA	M	**The Role of Social Media Digital Technology in Spreading Buddhism** 1.How does social media digital technology contribute to the spread of Buddhism? 2.What are the benefits of using social media digital technology for spreading Buddhist teachings? 3.What challenges are encountered in spreading Buddhism through social media digital technology?			

14	55778	VON VATHANA	M	**The Shift from Paper Records to Digital Record-Keeping Systems in Small-Scale Retail Businesses** 1. What sorts of record-keeping systems are currently in use by small retail businesses? 2. What variables impact the use of digital record-keeping systems in small retail businesses? 3. How does using digital record-keeping systems impact the operational success of small-scale retail businesses?	2	**Mrs. HOK LEAKHENA** **Tel: 099 999 805**	
15	56517	CHHOM ROSVISAL	M	**Developing an Online Ticketing & Seat-Selection System for a Cinema Enterprise** 1. What are the usability challenges customers face when buying tickets online? 2. How does real-time seat visualization affect purchase decisions? 3. What payment gateway features increase completed transactions?			
16	55685	CHHUM SREYPOV	F	**Sales and Inventory Management System with Cash Sales Reporting** 1. How does an automated system reduce errors in sales and inventory? 2. How can the system make cash sales easier to manage? 3. How does the system improve daily business reporting?			
17	57034	DIM HOURT	M	**Establishing an Employee Information Management System at Koh Kong Rubber Plantation** 1. What problems do rubber plantations face when managing employee information manually? 2. What features are required in a web-based Employee Information Management System for plantation operations? 3. How can the proposed system improve administrative efficiency and ensure data accuracy?			
18	56464	DIN RASIN	M	**E-Learning Platform with Interactive Assessments for BELTEI Courses** 1. How do interactive quizzes improve student engagement and learning outcomes? 2. What platform features help instructors at BELTEI monitor progress effectively? 3. How reliable is the platform under typical BELTEI concurrent user loads?			
19	57180	DOEM SARAY	F	**Attendance System Using QR Codes for BELTEI Lectures** 1. How accurate is QR-based attendance compared to manual registers? 2. What are user acceptance levels among lecturers and students? 3. What privacy concerns arise and how can they be mitigated?			
20	56142	HAI LEAPMENG	M	**Smart Mart Management System with Integrated KHQR Payment and Real-time Inventory Tracking** 1. How does real-time inventory tracking reduce stock issues? 2. What factors affect KHQR payment adoption? 3. What are the security risks of KHQR payments?			
21	57909	HAI SEAVYONG	M	**Design and Development of an Online Vehicle Booking Website** 1. What are the key functional and non-functional requirements of an online vehicle booking system? 2. How can a web-based system improve efficiency in vehicle booking management? 3. What design approach ensures a user-friendly experience for customers and administrators?			
22	56765	HIM VICHEKA	M	**The Relationship Between Developer Experience and Software Productivity** 1. How developers produce fewer software defects? 2. What are the professional training influence the relationship between developer experience and productivity? 3. How does the use of modern development tools influence productivity?			

23	55595	HOR SAMHONG	M	**E-Receipt and Digital Payment Integration in POS Systems** 1. How can e-receipts be effectively integrated into a POS system? 2. What are the technical requirements for integrating e-wallet and QR code payments? 3. How does the use of digital receipts affect paper consumption in retail stores?	2	**Mrs. HOK LEAKHENA** **Tel: 099 999 805**	
24	56504	KEAT PICH UDOM	M	**Exploring the Challenges of Requirement Gathering in Software Projects** 1. What factors contribute to these challenges? 2. How do requirement gathering issues impact the success or failure of software projects? 3. What methods or practices can help reduce problems in requirement gathering?			
25	56964	KEO SATHYARAK	M	**Design and Development of Pizza Application for Ordering in Chom Choa Location** 1. How can a mobile pizza ordering application improve the efficiency of order management for pizza shops in Chom Chao? 2. What features are most important for customers when ordering pizza through a mobile application? 3. How does a dedicated pizza ordering app affect customer satisfaction and service speed?			
26	55992	VENG SOVANNKERIYA	F	**Design and Implementation of a Web-Based Learning Management System (LMS) for University Students** 1. What are the requirements for developing a web-based Learning Management System for university students? 2. How effective is the developed LMS in supporting teaching and learning processes? 3. What are users' perceptions regarding the usability and functionality of the LMS?			
27	56127	KHEM SOPHEANAN	M	**Web-Based Design and Implementation of an Online Movie Ticket Booking System** 1. How can an online movie ticket booking system improve booking efficiency? 2. How can real-time seat selection prevent double booking? 3. What features most influence user satisfaction in booking systems?	3	**Mr. YIM RAKSMEY** **Tel: 015 272 782**	
28	61787	KOS KOEUK	M	**Developing a Student Attendance Management System with a Web-Based Application at BELTEI International University** 1. How can a web-based system efficiently manage student attendance at BELTEI International University? 2. What challenges exist in the current attendance tracking methods? 3. How does a web-based system improve attendance tracking efficiency compared to manual methods?			
29	57189	LENG SAROTH	M	**Developing a Web-Based Student Management Information System at BELTEI International University** 1. How can a web-based system manage student information effectively at BELTEI International University? 2. What problems exist in the current student information management process? 3. How does a web-based student management system improve data accuracy and efficiency?			
30	56288	LORN SELA	M	**Developing a Web-Based Attendance Management System at BELTEI International University** 1. How can a web-based system automate attendance recording? 2. How does the system improve accuracy of attendance data? 3. How efficient is the system compared to manual methods?			

31	56905	LY HONGKIM	M	**Designing and Implementation Web-Based Library Management System at BELTEI International University** 1. How can a web-based system simplify book borrowing and returning? 2. How does the system improve record-keeping of books and users? 3. How user-friendly is the system for librarians and students?	3	**Mr. YIM RAKSMEY** **Tel: 015 272 788**	
32	55517	MARA MASITA	F	**Design and Implementation of an E-Commerce System with Online Ordering and Point of Sale (POS) Integration** 1. How can an E-commerce system integrate online proudciton? 2. How does the system manage real-time product avialability and order status updates? 3. How can the system ensure payment processing and provide an effective user experience?			
33	57142	MEAS VANNY	M	**Design and Development of a Skill-Based Internship Matching System for University Students at BELTEI International University** 1. How does a skill-based internship matching system improve internship placement efficiency for university students? 2. How effective is rule-based matching compared to manual internship placement? 3. What factors influence student satisfaction with internship matching systems?			
34	57076	NAY SOKCHEAR	M	**E-Commerce Mobile Application for Small Businesses** 1. How can a mobile e-commerce app improve sales for small businesses? 2. What factors influence user trust in mobile e-commerce applications? 3. How does mobile payment integration affect customer purchase behavior?			
35	56230	PHORN RONG	M	**Designing and Developing an Online Hotel Room Booking System with Real-Time Availability Using the Laravel Framework** 1. How can an online hotel room booking system be designed to provide real-time room availability to users? 2. What factors ensure secure and reliable online booking and payment for hotel customers? 3. How does the implementation of a web-based booking system improve the efficiency of hotel room reservations compared to manual booking?			
36	56459	NOV THEARITH	M	**Designing and Developing a Mobile Application for POS Systems in Small Retail Stores** 1. What problem does your POS system solve compared to traditional cash registers or manual recording? 2. How does your system ensure accurate inventory updates after each sales transaction? 3. Why is a mobile-based POS system suitable for small retail stores?			
37	56208	PHANN SAMRACH VICHHEKA	M	**Building Customer Trust and Security in Online Shopping** 1. What specific signs (like a "Verified" badge or a professional design) make a new website look "safe" to a customer? 2. Where do most people go to check if an online store is a scam before they enter their credit card details? 3. Who is more likely to trust a new online brand: a customer who sees a "fast refund" policy or one who sees "secure payment" icons?			
38	54335	PHALL SOPHEA	M	**Gamification and Multimedia Design Enhancing Learning Through Interactive Elements** 1. How can multimedia design be optimized to support meaningful game mechanics without distracting from the learning objectives? 2. What challenges do educators or designers face when integrating gamification and multimedia into educational content? 3. How does age or educational level (primary, secondary, university) affect the impact of gamified multimedia learning?			

39	56248	PUT SOKCHAN	M	**Web-Based Attendance System Using QR Code at BELTEI International University Campus 2** 1. How effective is a QR-code-based attendance system compared to manual attendance? 2. How can a web application reduce attendance fraud? 3. What is the user satisfaction level when using a web-based attendance system?	4	**Mr. CHAN VOLAK** **Tel: 078 300 838**	
40	55734	RET CHITRA	M	**Student Score Management System at BELTEI International University Campus 2** 1. How does the SSMS improve score management at BELTEI IU Campus 2? 2. What challenges affect the use of the SSMS at BELTEI IU Campus 2? 3. How does the SSMS support academic ?			
41	57806	ROEUN DARY	M	**Movie Management Web Application with User Reviews and Media Content** 1. How can a movie website be developed to manage movie listings, user reviews, and streaming/trailer content effectively for both administrators and general users? 2. What are the differences in user experience, content accessibility, and engagement between logged-in users who can leave reviews and rate movies versus guest users who can only view content? 3. How can a movie website ensure secure, reliable, and accurate management of user data, movie information, and media content while providing smooth interactions for both admins and users?			
42	55904	SAM THAVRITH	M	**Build an E-Commerce Website with the Laravel Framework** 1. What are the key features of an e-commerce website that can be built using Laravel? 2. What are the benefits of using Laravel to build an e-commerce website? 3. How can Laravel be integrated with other systems, such as a payment gateway?			
43	57823	SATH CHHUNSEAK	M	**POS (Point of Sale) System for Sales and Payment using KHQR** 1. How can a POS system be developed to manage sales transactions and support both cash and KHQR digital payments effectively for retail businesses in Cambodia? 2. What are the differences in transaction speed, accuracy, and user experience between cash payments and KHQR payments in a POS system? 3. How can a POS system ensure secure, reliable, and accurate processing of sales data when handling both cash and KHQR payment methods?			
44	55723	SEM SREYNEAT	F	**Coffee Ordering Management System in Phnom Penh, Cambodia** 1. How can a Coffee Ordering Management System improve order accuracy and speed in coffee shops in Phnom Penh? 2. What features are most needed in a Coffee Ordering Management System for coffee businesses in Phnom Penh, Cambodia? 3. How does implementing a Coffee Ordering Management System affect customer satisfaction in Phnom Penh coffee shops?			
45	56753	SENG KIMSOR	M	**The Management System of Inventory for In-Store 1** 1. What are the different replenishment strategies available? 2. How can retailers forecast demand for their products? What are the different inventory forecasting models available? 3. How can retailers determine when and how much to reorder products?			
46	53638	SORN KIMLIN	F	**Design and Implementation of a Web Application for Student Online Registration** 1. What are the main features required in a student online registration web application? 2. How does a web-based registration system improve efficiency compared to manual registration? 3. What technologies can be used to design and implement a student online registration web application?			

47	56209	SUON VISAL	M	**Development of a Web-Based Hotel Reservation System with Real-Time Availability Management, Overbooking Prevention, and Operational Analytics** 1. How can real-time availability management be designed to handle online and walk-in bookings in a hotel reservation system? 2. How can overbooking be prevented through availability control mechanisms in a hotel reservation system? 3. How can operational analytics such as occupancy rate and revenue reports support hotel management decision-making?	4	**Mr. CHAN VOLAK** **Tel: 078 300 849**	
48	56207	TEY TAKAKVITYA	M	**Developing a Secure Web-Based Business-to-Consumer (B2C) E-Commerce System: A Case Study at HarikiProject Website** 1. How can a secure web-based B2C e-commerce system be developed to allow the admin to manage products and inventory effectively, including both normal and digital products? 2. How can the system facilitate smooth and reliable transactions for consumers, including order tracking for normal products and instant delivery for digital products? 3. How effective is the implemented system in terms of usability, security, and overall performance?			
49	55736	TONG DAVY	M	**Design and Implementation of a Web-Based E-Library System for Software Engineering Students at BELTEI International University** 1. What difficulties do Software Engineering students face when using an E-Library system? 2. What features can make a web-based E-Library system easier to use for students? 3. How can a web-based E-Library system support students' study activity?			
50	56734	VOUEN VISRA	M	**Developing E-Commerce with Django** 1. What are the core functionalities of an E-commerce website? 2. How to facilitate Search Engine Optimization for the whole website? 3. What values can business owners derive from having their own E-commerce website?			
51	58285	CHEA SEREYBOTH	M	**Assessing the Feasibility of Offline-First Mobile Learning Applications for Remote Areas: A Case Study at BELTEI International University** 1. What are the primary technological and infrastructural barriers that hinder the effective deployment of mobile learning applications in Cambodia's remote areas? 2. How do students and educators at BELTEI International University perceive the usability and effectiveness of offline-first features for remote learning? 3. Which specific mobile application features and content delivery methods are most effective for learners with limited connectivity and digital literacy?	5	**Mr. BUT CHOMREOUN** **Tel: 011 446 812**	
52	55676	CHEOUN DARO	M	**Design and Development of a Web Application for Salon Management: A Case Study of Mara Salon, Kamboul** 1. How can a web application improve appointment scheduling and business operations for Mara Salon in Kamboul? 2. What are the advantages of developing a salon management web application using modern web technologies for small salon businesses in Cambodia? 3. Which core features of a salon management web application best meet the needs of Mara Salon and its customers?			

53	56929	CHHIN KIMLENG	F	**Automated Thesis Tracking System for the Faculty of IT and Sciences at BELTEI International University** 1. What are the specific limitations of the existing manual or semi-automated thesis management processes at the Faculty of Information Technology and Sciences, BELTEI International University? 2. How can the proposed web-based system architecture be designed to ensure secure role-based access control (RBAC) and real-time data synchronization between students and supervisors? 3. Which key performance indicators (KPIs) demonstrate that the automated system significantly improves the efficiency of thesis submission and progress monitoring over traditional methods?	5	**Mr. BUT CHOMREOUN Tel: 011 446 815**	
54	57207	CHHOEUN NAVID	M	**Building a High-Performance E-Commerce System for Shoe Retailers Using Laravel/PHP** 1. What specific features and UI/UX design elements are essential for a shoe e-commerce website to enhance customer engagement and reduce cart abandonment? 2. How can the system be integrated with secure payment gateways and real-time inventory tracking to ensure reliable transactions? 3. Why is a responsive web design crucial for the success of a footwear e-commerce platform in the current mobile-first market in Cambodia?			
55	56719	CHHOEUN SREYNICH	F	**Design and Development of a Centralized Web-Based Scholarship Finder and Application Tracking System** 1. What core functionalities are essential for the system to streamline scholarship discovery and data management effectively? 2. How should the database architecture and status tracking mechanism be designed to ensure data accuracy and reliability? 3. How does this system minimize time consumption and enhance scholarship accessibility for students?			
56	55599	HONG PUTHBORMEY	F	**Design and Development of a Library Management System to Improve Cost Efficiency** 1. What improvements does a Library Management System provide to library operations compared to a manual system? 2. How does the implementation of a Library Management System reduce operational and administrative costs? 3. Why are system-generated reports important for supporting cost-efficient decision-making in library management?			
57	56440	KEO PHOLCHOMRUENNIZA	F	**Design and Development of an Automated Hotel Management System Using C# and SQL Server: A Case Study of a Local Hotel in Phnom Penh** 1. What are the key functional requirements and system modules needed to digitize the daily operations of a local hotel in Phnom Penh? 2. How can C# and SQL Server be integrated to ensure data consistency and real-time updates for room availability and guest billing? 3. To what extent does the developed system improve the speed and accuracy of guest check-in/out processes compared to manual methods?			
58	56140	KRY YET	M	**Development of a Web-Based Student Management System for BELTEI International University** 1.What specific challenges currently exist in BELTEI International University's student management process, and what essential features must the new system include to effectively address these issues? 2. Which specific technologies and database architecture should be implemented to develop a secure, efficient, and user-friendly web-based student management system? 3. To what extent does the developed system improve administrative task efficiency and enhance the tracking of student academic performance at BELTEI International University?			

59	56454	KUY BUNPANHA	M	**Design and Development of a Mobile Internship Management System using Flutter: A Case Study for BELTEI International University** 1. How can a Flutter-based mobile internship management system help BELTEI International University students find and organize internships more effectively? 2. What are the advantages of using Flutter to develop a mobile internship management application specifically for the BELTEI International University environment? 3. What is the difference in administrative efficiency between the traditional manual internship process and the proposed Flutter-based system at BELTEI International University?	5	**Mr. BUT CHOMREOUN Tel: 011 446 815**	
60	57095	LIM VEASNA	M	**Web-Based Student Attendance Management System for BELTEI International University** 1. What features should a web based student attendance management system include? 2. How does a web based attendance management system improve the accuracy and efficiency of attendance recording? 3. Why is a web based student attendance management system important for educational institutions?			
61	56596	MACH THEARY	M	**Design and Development of a Web-Based Employee Management System** 1. What are problems in traditional employee managemant in compannies? 2. How dose system improve the efficiency of managing employee information, attendance, and leave request within a company? 3. How to design the database structure to ensure data accuracy, integriti, and proper relationships between employees and company record?	6	**Mr. MAO SATYA Tel: 089 936 663**	
62	57786	MAO CHAMNOL	M	**Design and Development of a Web-Based E-Learning Platform for Universities in Cambodia** 1. How is the web-based e-learning platform designed and developed to support teaching and learning activities in universities? 2. How can the developed web-based e-learning platform help address the learning challenges faced by university students? 3. What advantages does the web-based e-learning platform provide for university instructors?			
63	56623	MENG SOKMEY	M	**Design and Implementation of an On-Demand Mobile Marketplace for Local Household Maintenance and Technical Services** 1. What are the essential functional features of a mobile marketplace required to effectively bridge the gap between urban consumers and verified technical service providers in Cambodia? 2. How can the integration of a real-time status-tracking and bidding architecture in Flutter and Firebase optimize the efficiency and transparency of technical service delivery? 3. Why is a secure, role-based digital system more effective than traditional manual searching for ensuring service reliability and data safety for users?			
64	57768	MOTH RITHYSAK	M	**Cloud-based Inventory Management System with Predictive Stock Ordering** 1. Why are traditional (manual or desktop-based) inventory systems inefficient for small enterprises? 2. How does the system manage product stock, suppliers, and sales transactions? 3. Why the cloud-based system improve efficiency compared to traditional inventory systems?			

65	56768	NHEM SOMEAN	M	**Design and Development of a Web-Based Point of Sale (POS) System with Staff Management Functionality for Retail Shops** 1. How is the POS system designed and developed to support sales transactions and staff management? 2. What are the main functional features of the POS system for managing sales and staff operations? 3. How does the POS system help reduce operational and staff-related errors in daily business activities?	6	**Mr. MAO SATYA** **Tel: 089 936 664**	
66	57084	NIM SOPHARA	M	**Design and Development of a Web-Based Stock Management System for a Bookstore** 1. What are the specific features and management capabilities that this system can handle? 2. What are the technical requirements and data synchronization challenges when integrating a web-based stock system with external POS and E-commerce APIs? 3. How does the implementation of Barcode/QR Code scanning compare to manual data entry in terms of system throughput and the reduction of human error in inventory updates?			
67	57208	NOK SREYROTH	F	**Design and Implementation of an E-Commerce for Apparel Retail** 1. How does tier-based personalization (customer segments, targeted notifications, and personalized coupons) affect purchase behavior and customer loyalty in mobile clothing e-commerce? 2. What is the impact of offering multiple payment options (digital payment vs. Cash on Delivery) on checkout conversion rates and customer satisfaction? 3. How does the design of a state-driven Order Management improve the efficiency and transparency of the return and cancellation lifecycle?			
68	56871	ONN RATANA	M	**Design and Development of a Mini Mart Sales Management System** 1. How is the Mini Mart Sales Management System designed and developed to support daily sales operations? 2. What are the main functional features of the Mini Mart Sales Management System for managing sales and products? 3. How does the developed system help improve sales efficiency and accuracy in mini mart operations?			
69	57558	PHEAP PHALLY	M	**Design and Implementation of a Food E-Commerce** 1. What are the core features required in an e-commerce website that sells food, and why are they important compared to a normal product-selling website? 2. How should the database of a food e-commerce website be designed to manage products, orders, customers, and food freshness effectively? 3. What challenges do food e-commerce websites face in customer trust and delivery, and how can the website design to solve those problems?			
70	57237	PRUM META	M	**Design and Development of a Student Room Rental Mobile Application Using Flutter** 1. What functional and non-functional requirements are necessary for a student room rental mobile application? 2. How is the application designed and developed using Flutter and a client–server architecture to support room listing and booking features? 3. How effective is the developed application in helping students search, view, and manage room rentals based on system testing and user evaluation?			
71	56145	RET NAPHUT	M	**Smart Ordering System for Small Clothing Stores in Phnom Penh** 1. What is SmartOrder and how does it work? 2. Why is it important for small clothing stores? 3. How can it improve order management and sales?	7	**Mr. HY LENGSE** **Tel: 096 706 6671**	

72	55433	RIN SREYNICH	F	**Design and Development of an Online Skin Care and Cosmetic Ordering Website** 1. How can a skin care and cosmetic ordering website be designed and developed using software engineering principles? 2. What are the key features and functions that are required for a skin care and cosmetic ordering website to support customers and system administrators? 3. How can a skin care and cosmetic ordering website help make ordering and purchasing products easier and more efficient?	7	**Mr. HY LENGSE** **Tel: 096 706 6672**	
73	57048	SARARY DAVID	M	**Design and Development of a Mobile App for Motorcycle Repair Shop and Pickup Spotting Using Flutter and Firebase with Google Maps API** 1. What are the main features needed in a mobile app for spotting motorcycle repairshop and pickup services? 2. Why is a real-time mobile app important for spotting help when a rider breaks down? 3. How can the integration of Google Maps API improve the efficiency of finding and connecting with nearby technicians?			
74	58312	SENG NOEUN	M	**Platform Usability and Khmer Language Interface Affecting Customer Satisfaction in Online Grocery Shopping in Cambodia** 1. How does platform usability affect customer satisfaction in online grocery shopping in Cambodia? 2. How does the use of Khmer language in the platform interface influence customer satisfaction? 3. Which factor—platform usability or Khmer language interface—has a stronger impact on customer satisfaction?			
75	56465	SETH CHANDARA	M	**Implementation of an E-Commerce Web Platform with Integrated Product Sentiment Analysis** 1. How can the integration of automated sentiment analysis on product reviews improve the customer's purchasing decision-making process? 2. How effective are Natural Language Processing (NLP) models in accurately categorizing consumer feedback into positive, negative, and neutral sentiments within a web environment? 3. What features are necessary to provide merchants with an analytical dashboard that offers actionable insights into customer satisfaction trends?			
76	57788	SORM SOPHAT	M	**Food Delivery Mobile Application** 1. What are the main features required in a food delivery system for users, chefs, and delivery partners? 2. Why is real-time order tracking using map integration important in a food delivery application? 3. How does integrating KHQR payment through deeplink improve the convenience and security of online food ordering?			
77	58316	THIEM SOKUN	F	**Online Ordering System for Small Businesses** 1. What is a Web-Based Online Ordering System? 2. Why is it important to develop a Web-Based Online Ordering System? 3. How will the system be developed and implemented?			
78	55648	THY MUOYHAK	M	**Implementation of an E-Learning Web Platform with Video-Based Learning and KHQR Payment Integration** 1. How can a web-based e-learning platform improve students' learning experience through video lessons? 2. How effective is KHQR digital payment for purchasing online courses in Cambodia? 3. What features are necessary to ensure secure access and management of paid video learning content?			

79	56048	VAN SOPHARA	M	**Implementation of a Web-Based Dormitory Management System** 1. How can a web-based management system automate manual tasks such as room assignments, tenant registration, and rent tracking to reduce human error? 2. What features are necessary to provide real-time updates on room availability and automate the generation of monthly invoices for utilities and rent? 3. How can the system improve communication between residents and management through digital maintenance requests and secure notification systems?	7	**Mr. HY LENGSE** **Tel: 096 706 6672**	
80	55662	VANN LEAB	M	**A Simple Web-Based System for Selling Computer Products such as Laptops, Desktop Computers, and Accessories** 1. How can a simple web-based system support the online selling of computer products such as laptops, desktop computers, and accessories? 2. What essential features are required for a web-based system that sells computer products? 3. How does the web-based system help small computer sellers reach customers more easily and efficiently?			
81	56612	VUTH KUNTHY	F	**Computer Store with Online Payment** 1. How does a Computer Store with Online Payment improve the efficiency of the sales and payment process? 2. What impact does the online payment system have on customer satisfaction in an online computer store? 3. How does implementing an online payment system help reduce order and payment management problems compared to a traditional computer store?	8	**Mr. HOU KEANAN** **Tel: 096 986 8471**	
82	56731	BEN MENGHONG	M	**Design and Implementation of a Web-Based System for Course Management and Student Attendance Tracking at Beltei International University** 1. What are the functional and non-functional requirements needed to develop a web-based system for course management and student attendance tracking at Beltei International University? 2. How can a web-based system be designed and implemented to efficiently manage courses and track student attendance at Beltei International University? 3. What are the benefits of using a web-based course and attendance management system compared to the current manual process at Beltei International University?			
83	56611	BORN SREYBY	F	**The Development of a Web-Based Exam Affairs Management System for BELTEI International University's Faculty of Information Technology and Science** 1. What are the current challenges in managing exam affairs in the Faculty of Information Technology and Science at BELTEI International University? 2. What essential features and functionalities should be included in a web-based exam affairs management system to ensure efficiency and accuracy? 3. How does implementing a web-based exam affairs management system impact administrative efficiency, exam processing time, and overall user satisfaction?			
84	56746	CHANN PISETH	M	**Development of a Web-Based Online Food Ordering System** 1. How can a web-based online food ordering system be designed and developed to improve the efficiency of food ordering for customers and restaurants? 2. What are the essential features required in a web-based food ordering system to ensure usability, accuracy, and customer satisfaction? 3. How does the implementation of a web-based online food ordering system reduce order processing time and errors compared to traditional ordering methods?			

85	55876	DY THIDA	F	**Development of a Web-Based Skin Care E-commerce Platform** 1. What core features are essential in developing a web-based skin care e-commerce platform to support product discovery, personalization, and secure checkout? 2. How can skin type analysis and personalized product recommendations be effectively implemented in a web-based skin care e-commerce system? 3. What security mechanisms are required to protect customer data and online transactions in a web-based skin care e-commerce platform?	8	**Mr. HOU KEANAN** **Tel: 096 986 8477**	
86	57695	HAI CHAMROEURN	M	**Using Artificial Intelligence to Improve the Efficiency of Research in the Field of Education at BELTEI International University** 1. How is artificial intelligence used to improve research efficiency in the field of education at BELTEI University? 2. What impact does the use of artificial intelligence have on the speed and quality of research conducted by students in the field of education at BELTEI University? 3. What challenges and limitations do students face when using artificial intelligence for research in the field of education at BELTEI University?			
87	57419	HOR BORA	M	**Car Store with Online Payment** 1. How does the integration of an online payment and ordering system improve the efficiency of vehicle transactions compared to traditional manual dealership processes? 2. What extent does providing multiple digital payment options and a streamlined online reservation process enhance the overall satisfaction of car buyers? 3. What ways does a centralized digital management system reduce human error in vehicle inventory tracking and financial record-keeping for the dealership?			
88	56926	KHUNSOKHON LINDA	F	**Design and Development of a Mobile Application for a Bookstore** 1. What problems do bookstores face in managing sales and customer services without a mobile application? 2. What features are essential in a mobile bookstore application? 3. How can a mobile app improve customer convenience and business efficiency?			
89	56613	LARN CHANTHORN	F	**The Student Portal Management System for the Faculty of Information Technology at BELTEI International University** 1. What is a Student Management System (Student Portal), and why is it important for the Faculty of Information Technology at BELTEI International University? 2. How to use the main features of a student portal and describe how each feature benefits students? 3. What challenges may occur during the development and implementation of a student management system at BELTEI International University, and what possible solutions are there?			
90	57053	MAN CHANTHA	M	**The Impact of Social Media on Students' Academic Performance** 1. How often do students use social media for non-academic purposes each day? 2. What effects does social media usage have on students' study habits and concentration? 3. Is there a relationship between time spent on social media and students' academic results?			

91	56833	OUN KAKNIKA	F	**Beltei University's Student Information Management System in the Faculty of Information Technology and Science** 1. How does the Student Information Management System improve academic record management and administrative efficiency in the Faculty of Information Technology and Science at Beltei University? 2. How does the SIMS (Student Information Management System) ensure data accuracy, security, and privacy for student information at Beltei University? 3. What challenges are faced in implementing and maintaining the Student Information Management System in the Faculty of Information Technology and Science?	9	**Mr. KOEUT BORA** **Tel: 017 882 724**	
92	56361	PHAL PANHA	M	**Design and Implementation of Student Management System** 1. What problems exist in student data management and academic record-keeping in the current manual or semi-digital system? 2. How can an automated student management system improve data accuracy and transparency in grading and attendance tracking? 3. How does the system affect administrative productivity and the overall satisfaction of students and faculty?			
93	56643	PHENG LONGDY	M	**Design and Implementation of an Employee Management System** 1. What problems exist in employee data management in the current manual or semi-digital system? 2. How can an automated employee management system improve accuracy and transparency? 3. How does the system affect HR productivity and employee satisfaction?			
94	57055	RETH VIRAK	M	**Design and Development of a Room Rental Management System for Student Accommodation at BELTEI International University** 1. What difficulties do students experience in renting and managing accommodation at BELTEI International University using the current manual system? 2. How can a room rental management system improve efficiency, transparency, and communication between students and university administrators? 3. What challenges may arise in implementing and managing a room rental management system for student accommodation at BELTEI International University?			
95	56898	RI RIM	M	**Development of a Web-Based Lecturer Portal for Academic Management in the Faculty of IT at Beltei International University** 1. What challenges do lecturers in the Faculty of IT face when managing academic tasks using the current system? 2. What features should be included in a Web-Based Lecturer Portal to meet lecturers' requirements? 3. How does the use of a Web-Based system affect the work efficiency of lecturers? 4.To what extent can a Web-Based Lecturer Portal reduce time consumption and errors in academic data management?			
96	57791	SENG SOPUOL	M	**The Impact of Bakong on Digital Transactions and Financial Inclusion in Cambodia** 1. How has Bakong influenced the adoption of digital transactions in Cambodia? 2. What factors affect users' acceptance and usage of Bakong? 3. How does Bakong contribute to financial inclusion among unbanked and underbanked populations?			

97	61775	SEV HAY	M	**Design and Implementation of an Integrated Online Reservation and Appointment Booking System: A Case Study of Le Urban Hotel** 1. What challenges does Le Urban Hotel face in managing room reservations and service appointments using its current or non-integrated booking methods? 2. How can an integrated online reservation and appointment booking system improve availability management, reduce booking conflicts, and enhance operational efficiency at Le Urban Hotel? 3. What functional and non-functional requirements are necessary for developing an effective online reservation and appointment booking system for Le Urban Hotel?	9	**Mr. KOEUT BORA** **Tel: 017 882 733**	
98	56678	SITH SEKREYSURSDEY	F	**Mobile App of Hotel Management System Booking** 1. How does the implementation of a mobile hotel booking app influence customer satisfaction compared to traditional booking channels? 2. What are the key usability and design features that improve user experience in hotel booking mobile applications? 3. How can mobile hotel booking apps integrate real-time room availability and pricing to enhance booking efficiency?			
99	56896	SOK LAISENG	M	**Design and Development of a Web-Based Campus Event Management System: A Case Study of BELTEI International University** 1. What challenges currently exist in managing campus events at BELTEI International University, and how do these challenges affect students, staff, and event organizers? 2. What functional and non-functional requirements are necessary for designing a Campus Event Management System, and how can these requirements be tailored to meet the specific needs of BELTEI International University? 3. What improvements in usability, efficiency, and user satisfaction can be achieved through the proposed Campus Event Management System, and how can these improvements be evaluated in comparison with the existing manual practices at BELTEI International University?			
100	57157	TOB MENGHONG	M	**Design and Evaluation of a Smart Task Management Application for Improving Student Productivity** 1. What problems do university students face when managing their daily tasks using existing task management tools? 2. How can a smart task management application be designed to support students in organizing and prioritizing their daily tasks? 3. How effective is the proposed task management application in improving students' productivity and task completion?			

Notes:

1. Meeting with all Supervisors: **February 06, 2026**
2. Seminar/Orientation with Supervisors and Students: **March 30, 2026**
3. Due date for Research Proposal Paper (3 chapters) Submission: **May 25, 2026**
4. Due date for Research Progressive Paper (6 chapters) Submission: **July 06, 2026**
5. Due date for BA-Thesis and Defense Slides Submission: **November 10, 2026**

Phnom Penh, Date: 13.../...06...../2026

President
